

SECTION 1: INTRODUCTION

- 1 History of dermatopathology
- 2 Hematoxylin and eosin

SECTION 2: SPECIAL STAINS

- 3 Special stains: background
- 4 Applications in dermatopathology

SECTION 3: IMMUNOHISTOCHEMISTRY

- 5 Immunohistochemistry: background
- 6 Immunohistochemical markers
- 7 Common immunohistochemical panels

SECTION 4: POINT OF CARE TESTING

- 8 Dermatological point of care tests

SECTION 5: IMMUNOFLUORESCENCE

- 9 Immunofluorescence: principles
- 10 Immunofluorescence: applications in dermatopathology

SECTION 6: ELECTRON MICROSCOPY

- 11 History of electron microscopy
- 12 Electron microscopy: applications

SECTION 7: MOLECULAR TESTING

- 13 In situ hybridization (non-FISH)
- 14 Fluorescence in situ hybridization
- 15 T/B gene rearrangement assays
- 16 PCR, sequencing, and gene expression profiling

SECTION 8: SUMMARY

- 17 Final thoughts
