PREFACE

Neurosurgery Review is a book written for a rapid revision of usually forgotten concepts of Neurosurgery. This book can guide the post-graduates busy in preparing for entrance examinations of Neurosurgery.

It was realized that different institutions have different pattern of questions for MCh entrance examinations. We have tried to evolve a method by which all kinds of variations in questions framed by different institutions can be addressed by the current book. Simultaneously, it has been tried that every question and all options of each question should remain informative. The explanations wherever required have also been included at the end of the question(s) in order to offer a reasoning behind the particular answer and reasoning for other options included in that question as well.

We have also given tips, not in the form of questions, but in the form of statements, which would greatly help in answering the questions not covered in this book.

This book will help the following groups of neurosurgical colleagues:

- Aspirants preparing for examinations of MCh
- Academicians for quick revision
- Clinicians for revision of concepts

This book would offer great help to those who are beginners in Neurosurgery, as it does not contain the detailed text of a particular disease, but covers the concepts of entire Neurosurgery.
