Preface

This book is for Medical, Aurvedic, Homoeopathic, Paramedical, undergraduates and postgraduate students and indeed for all concerned with surgery. I have tried my best to touch and selected the topics covering almost every field of surgery in its widest sense. It is liberally illustrated with the relevant text. This manual is intended to serve a ready source of information about surgical instruments. I hope this edited manual will prove valuable both to the trainee surgeon and to the established practitioners. Hopefully it will also excite some who read it sufficiently to want to know more about the surgical instruments. As a young doctor in training, I found that there was no such type of book which covers all the instruments related to every branch of surgery. Since then, I had a thought to edit such type of book in future, which is in your hand.

I remain eternally grateful for the ongoing support and understanding of my long suffering wife—Rita, and our two children—Raveena and Raghav, without whose support and encouragement I would not have been able to complete this book. Innumerable individuals deserve my profound thanks. I continue to acknowledge their gratitude to the now heavenly - my father and mother for their inspiration to me for lifetime service of medical practice. I am grateful to Dr (Prof) MM Bagree, Dr (Prof) SS Rathore, Dr (Prof) Mangal Badal, Dr (Prof) Kamal Kant Sharma, etc., who continuously encouraged me. I am particularly grateful to my elder brother— Ram Krishan, friend/Er Bhajan Lal Arya, Ch Anil Singhmar for their unlimited support.

A very special thanks goes to Shri Jitedar P Vij, (Chairman and Managing Director), Tarun Duneja, (Director Publishing) and the staff of Jaypee Brothers Medical Publishers (P) Ltd. New Delhi for their very good cooperation. Any suggestions regarding this book will always be welcomed.

Rajendra Singh Sewta

Contents

1. Care of Instruments	1
2. Electrosurgery (Diathermy)	5
3. Sterilization	16
4. Suture Material	43
5. Syringes and Needles	55
