<b>1. Infections in Neonates</b>	<b>1</b>	
<i>Rhishikesb Thakre, Sandeep Kadam</i>		
<b>1.1 Superficial Infections</b>	<b>3</b>	
• Acute Otitis Media	3	
• Bacille Calmette-Guérin Abscess	3	
• Breast Abscess	3	
• Cellulitis	4	
• Conjunctivitis	4	
• Gangrene	4	
• Impetigo	5	
• Neonatal Scabies	5	
• Oral Thrush	5	
• Pustules	6	
• Umbilical Sepsis	6	
<b>1.2 Systemic Infections</b>	<b>6</b>	
• Brain Abscess	6	
• Necrotizing Enterocolitis	7	
• Neonatal Candidiasis	7	
• Neonatal Osteomyelitis	7	
• Neonatal Meningitis	8	
• Pneumonia with Pneumatoceles	8	
• Sclerema Neonatorum	8	
• Septic Shock	9	
• Staphylococcal Scalded Skin Syndrome	9	
<b>1.3 Congenital Infections</b>	<b>9</b>	
• Congenital Cytomegalovirus	9	
• Congenital HIV	10	
• Congenital Rubella Syndrome	10	
• Congenital Syphilis	10	
• Congenital Toxoplasmosis	11	
• Congenital Tuberculosis	11	
• Neonatal Chickenpox	11	
• Neonatal Tetanus	12	
<b>1.4 Miscellaneous</b>	<b>12</b>	
• Hand Washing	12	
• Sepsis Screen	12	
<b>2. Fever with Rash</b>	<b>13</b>	
<i>Arun Shah, Ketan H Shah</i>		
• Impetigo	15	
• Erythema Nodosum	15	
• Necrotizing Fasciitis	16	
• Erythema Marginatum	16	
• Hand-Foot-and-Mouth Disease	17	
• Henoch-Schönlein Purpura	17	
• Herpes Zoster	18	
• Janeway Lesion	18	
• Meningococcal Lesion	19	
• Staphylococcal Scalded Skin Syndrome	19	
• Toxic Epidermal Necrolysis	20	
• Toxic Shock Syndrome	21	
• Urticaria	22	
• Herpetic Gingivostomatitis	22	
• Systemic Lupus Erythematosus	23	
• Aplastic Anemia	23	
• Post Kala-Azar Dermal Leishmaniasis	23	
• Conjunctivitis with Coryza	24	
• Classical Rash of Dengue Fever	24	
• Petechial Spots on Lower Limb with Occasional Macules	25	
• Measles Rash	25	
• Black Discoloration and Hyperpigmentation	25	
• Erythematous Changes on Sole and Tip of the Toe	26	
• Red Ear due to Chikungunya Fever	26	
• Freckle-like Pigmentation at Recovery	26	
• Multiple Purpurae with Blueberry Muffin Rash	27	
• Pale Rose Red Blanching Macules and Papules on the Palm	27	
• Vasculitis with Gangrenous Changes in Same Patient of Rickettsia	27	
<b>3. Respiratory Tract Infections</b>	<b>29</b>	
<i>S Nagabhushana, Devaraj Raichur</i>		
<b>3.1 Upper Respiratory Tract Infections</b>	<b>31</b>	
• Membranous Tonsillopharyngitis due to <i>Klebsiella pneumoniae</i>	31	
• Pansinusitis—Sphenoidal, Frontal, Maxillary Sinusitis—CT Paranasal Sinuses	32	
• Oral Candidiasis	32	
• Croup Syndrome	33	
• Retropharyngeal Abscess	33	
• Epiglottitis	34	
• Pertussis with Subconjunctival Hemorrhage	34	
<b>3.2 Lower Respiratory Tract Infections</b>	<b>34</b>	
• Round Pneumonia	34	
• Thymus	35	
• Consolidation: Left Lower Lobe	35	
• Consolidation: Right Upper Lobe	36	
• Unilateral Hilar Lymphadenopathy	36	
• Chest Indrawing	37	
• Acute Bronchiolitis	37	
• Acute Bronchiolitis with Segmental Collapse of the Left Lower Lobe	37	
• Bronchiolitis with Multiple Atelectatic/Pneumonic Patches	38	

- Wheeze Associated Lower Respiratory Infection 38
- Viral Croup with WALRI 38
- Pneumomediastinum with Surgical Emphysema in WALRI 39
- Pneumomediastinum with Surgical Emphysema in WALRI-Clinical Profile 39
- Collapse-Consolidation RUL 39
- Collapse-Consolidation RUL in GB Syndrome with Palatopharyngeal Paralysis 40
- Parapneumonic Effusion—Left 41
- Dengue Fever with Right Pleural Effusion 41
- Empyema Left Side—Soft Tissue Bulge 41
- Empyema Right Side 42
- Measles with Right-Sided Empyema 42
- Pulmonary Tuberculosis 42
- Cavitory Tuberculosis with Necrotizing Bronchopneumonia 43
- HIV with Tuberculosis 43
- HIV with *Pneumocystis jiroveci (carinii)* Pneumonia—Early 44
- HIV with *Pneumocystis jiroveci (carinii)* Pneumonia—Late 44
- Lung Abscess with Bronchopneumonia 44
- Lung Abscess with Right-Middle-Lobe Consolidation 45
- Staphylococcal Pneumonia 45
- Congenital Pneumonia 45
- Calcified Hilar Node—Tuberculosis 46
- Multiple Cysts Left Side 46
- Mass Lesion in Right Hemithorax 46
- Pneumonia both Lower Lobes 47
- Pneumonia with Parapneumonic Effusion 47
- Tension Pneumothorax with Pneumatocoles with Subcutaneous Emphysema 48
- Postcardiac Repair State—Atelectasis both Lower Lobes Endobronchial Tuberculosis 48

**4. Gastrointestinal Infections 49**

*Neelam Mohan, Yogesh Waikar*

**4.1 Gastrointestinal Infections 51**

- Ascariasis (Roundworms) 51
- Pseudomembranous Colitis 51
- Colitis 52
- Esophageal Candidiasis 52
- Abdominal Tuberculosis 53
- Appendicitis 54
- Necrotizing Enterocolitis 54

**4.2 Hepatobiliary Infections 55**

- Hydatid Cyst 55
- Amebic Liver Abscess 56
- Pyogenic Liver Abscess 56

**5. Urinary Tract Infections 57**

*Brigadier Madhuri Kanitkar, Pankaj V Deshpande*

**5.1 Clinical Features and Procedures 59**

- PU Valves Presenting Late 59
- Voiding Disorder—Underactive Bladder 59
- Voiding Disorder—Overactive Bladder 59
- Bladder Catheterization 60
- Urine Sample Collection using Urine Bag 60
- Urine Collection by Suprapubic Aspiration 61

**5.2 Abnormalities on US Scan 61**

- USG showing Dilated Ureter 61
- Hydronephrosis due to PUJ Obstruction 62
- USG showing Ureterocele 62

**5.3 Abnormalities on DMSA Scan 63**

- DMSA Abnormalities 6–8 Weeks After UTI 63
- DMSA Abnormalities 6 Months After UTI 63
- DMSA Scan showing Scarred Ectopic Kidney 63

**5.4 Abnormalities on MCUG 64**

- PUV with Trabeculated Bladder and Grade V Reflux 64
- Spinning Top Bladder 64
- Christmas Tree Bladder 65
- MCUG showing Vesico-colic Fistula 65
- MCUG showing Severe VUR 66
- MCUG showing Bilateral VUR Grade 3 67

**5.5 Other Studies 68**

- X-ray showing Renal Calculus 68
- Nephrostogram in an Infant 69
- DRCG showing VUR 70

**6. Infections in Central Nervous System 71**

*Ritesh C Shah, Shekhar Patil*

**6.1 Viral CNS Infections 73**

- Japanese B Encephalitis 73
- Herpes Simplex Virus Encephalitis 73
- Acute Disseminated Encephalomyelitis 74
- Subacute Sclerosing Panencephalitis 74
- Viral Encephalitis 75
- Minimal Encephalopathy with Reversible Splenial Lesion 76
- Intrauterine Infection—Cytomegalovirus Illness 76
- Postherpes Zoster Facial Palsy 76
- Human Immunodeficiency Virus Encephalopathy 77
- Postinfectious Transverse Myelitis 78

**6.2 Bacterial CNS Infections 79**

- Brain Abscess 79
- Ventriculitis 79
- Recurrent Meningitis 80

• Subdural Empyema	80		
• Tuberculous Meningitis	81		
• Tuberculoma with Hydrocephalus	81		
<b>6.3 Parasitic CNS Infections</b>	<b>82</b>		
• Neurocysticercosis	82		
• Multiple Neurocysticercosis	82		
• Hydatid Cyst	83		
• Toxoplasmosis	83		
<b>7. Skin and Soft Tissue Infections</b>	<b>85</b>		
<i>C Vijayabhaskar Chandran</i>			
<b>7.1 Viral Skin Infections</b>	<b>87</b>		
• Hand-Foot-and-Mouth Disease	87		
• Herpes Zoster in a One-and-Half-Year-Old Boy	87		
• Herpes Zoster in a 2-Year-Old Child	88		
• Molluscum Contagiosum	88		
• Giant Molluscum Contagiosum in an HIV Child	89		
• Herpes Simplex	89		
<b>7.2 Bacterial Skin Infections</b>	<b>90</b>		
• Furunculosis	90		
• Impetigo	90		
• Impetigo with Staphylococcal-Scalded Skin Syndrome	91		
• Cutaneous Tuberculosis – Lupus Vulgaris	91		
• Impetigo-Cellulitis	91		
• Necrotizing Fasciitis	92		
<b>7.3 Fungal Skin Infections</b>	<b>92</b>		
• Pityriasis Versicolor	92		
• Pityriasis Versicolor on Forehead	92		
• Tinea Capitis	93		
• Kerion—A Type of Tinea Capitis	93		
<b>7.4 Parasitic Skin Infections</b>	<b>94</b>		
• Scabies	94		
• Cutaneous Larva Migrans	94		
<b>7.5 Miscellaneous</b>	<b>95</b>		
• Acne Vulgaris	95		
<b>8. Ophthalmic Infections</b>	<b>97</b>		
<i>Atul Seth</i>			
<b>8.1 Lid and Orbital Infections</b>	<b>99</b>		
• Blepharitis	99		
• Hordeolum Internum	99		
• Preseptal Cellulitis	99		
• Orbital Cellulitis	100		
• Orbital Mycoticercosis	100		
• Lid Abscess	101		
• Tuberculous Lid Mass	101		
<b>8.2 Lacrimal Sac Infections</b>	<b>101</b>		
• Congenital Dacryocoele	101		
• Acute Dacryocystitis	102		
<b>8.3 Conjunctival Infections</b>	<b>102</b>		
• Viral Pseudomembranous Conjunctivitis	102		
<b>8.4 Corneal Infections</b>	<b>102</b>		
• Bacterial Corneal Ulcer	102		
• Fungal Corneal Ulcer	103		
• Herpes Simplex Keratitis	103		
• Herpes Zoster Ophthalmicus	103		
<b>8.5 Retinal and Posterior Segment Infections</b>	<b>104</b>		
• Toxoplasma Retinitis	104		
• Cytomegalovirus Retinitis	104		
<b>9. Ear, Nose and Throat Infections</b>	<b>105</b>		
<i>Pradip Uppal</i>			
<b>9.1 Ear</b>	<b>107</b>		
• Early Acute Otitis Media	107		
• Acute Otitis Media	107		
• Resolving Acute Otitis Media	107		
• Acute Otitis Media with Perforation (Acute Suppurative Otitis Media)	108		
• Acute Bullous Myringitis	108		
• Otitis Media with Effusion	108		
• Atelectasis	109		
• Myringotomy Tube (Grommet and Ventilating Tube)	109		
• Perforation	109		
• Subtotal Perforation	110		
• Primary Acquired Cholesteatoma	110		
• Cholesteatoma	110		
• Facial Palsy	111		
• Aural Polyp	111		
• Otitis Externa	111		
• Infected Wax Granuloma	112		
• Otomycosis	112		
• Impetigo	112		
• Mastoid Abscess	113		
• Preaurical Sinus	113		
• Preauricular Abscess	113		
<b>9.2 Nose</b>	<b>114</b>		
• Epistaxis from Little's Area	114		
• Granuloma in Little's Area	114		
• Nasal Vestibulitis	114		
• Early Vestibulitis	115		
• Vestibular Abscess	115		
• Allergic Rhinosinusitis	115		
• Septal Hematoma/Septal Abscess	116		
• Orbital Abscess	116		
• Rhinosporidiosis	117		
• Lacrimal Fistula	117		
<b>9.3 Throat</b>	<b>117</b>		
• Tonsils	117		
• Follicular Tonsillitis	118		
• Membranous Tonsillitis	118		
• Quinsy (Peritonsillar Abscess)	118		
• Granular Pharyngitis	119		
• Diphtheria	119		
• Adenoids	119		
• Radiology Adenoid Hypertrophy	120		

• Preauricular Abscess	120		
• Cold Abscess Neck	120		
• Laryngeal Papillomatosis	121		
• Erythema Multiforme	121		
• Palatal Perforation	122		
<b>10. Infections in Musculoskeletal System</b>	<b>123</b>		
<i>Alaric Aroojis</i>			
<b>10.1 Acute Septic Arthritis</b>	<b>125</b>		
• Acute Septic Arthritis of Right Hip Joint	125		
• Neonatal Hip Joint Infection	125		
• Treatment of Hip Joint Septic Arthritis	126		
• Late Presentation of Hip Septic Arthritis	126		
• Shoulder Joint Septic Arthritis	127		
<b>10.2 Acute Hematogenous Osteomyelitis</b>	<b>127</b>		
• Acute Osteomyelitis Left Proximal Femur	127		
• Acute Osteomyelitis Left Distal Femur	128		
<b>10.3 Sequelae of Acute Osteomyelitis</b>	<b>128</b>		
• Chronic Osteomyelitis with Sequestration and Gap Nonunion of Femur	128		
• Chronic Osteomyelitis with Sequestrum	129		
• Bone Loss of the Tibia following Osteomyelitis	129		
• Bone Loss and Gap Nonunion of Humerus following Osteomyelitis	130		
<b>10.4 Sequelae of Septic Arthritis</b>	<b>131</b>		
• Complete Destruction of Proximal Femoral Epiphysis following Osteomyelitis and Septic Arthritis	131		
• Dislocation of the Hip Joint following Septic Arthritis	131		
• Tom Smith's Arthritis causing Bilateral Loss of Capital Femoral Epiphysis	132		
• Reconstructive Options for Tom Smith's Arthritis of Right Hip	132		
• Sequel of Septic Arthritis of Knee	133		
<b>11. Infections Requiring Surgical Care</b>	<b>135</b>		
<i>Arbinder Kumar Singal</i>			
<b>11.1 General Infections</b>	<b>137</b>		
• Scalp Abscess	137		
• Breast Abscess	137		
• Axillary Abscess	137		
• Infected Branchial Cyst	138		
• Infected Thyroglossal Cyst	138		
• Umbilical Sepsis (Omphalitis)	138		
• Necrotizing Fasciitis	139		
<b>11.2 Chest and Thorax</b>	<b>139</b>		
• Chest Wall Abscess	139		
• Pneumatocele	140		
• Empyema	140		
• Lung Abscess	141		
• Hydatid Cyst	141		
• Bronchiectasis	141		
<b>11.3 Gastrointestinal Infections</b>	<b>142</b>		
• Necrotizing Enterocolitis	142		
• Appendicitis	142		
• Peritonitis	143		
• Ascariasis	143		
• Amebic Liver Abscess	143		
<b>11.4 Urological Conditions causing Urinary Infections</b>	<b>144</b>		
• Antenatally Diagnosed Hydronephrosis	144		
• Pelvi-ureteric Junction Obstruction	144		
• Duplex System	145		
• Ureterocele	145		
• Vesico-ureteric Reflux	146		
• Posterior Urethral Valves	146		
• Bladder Diverticulum	146		
• Neuropathic Bladder	147		
• Dysfunctional Voiding	147		
• Epididymo-orchitis	148		
• Phimosis	148		
• Labial Adhesions	148		
• Urolithiasis	149		
<b>12. Infections in the Immunocompromised Child</b>	<b>151</b>		
<i>Anita Shet</i>			
• Bacille Calmette-Guérin Adenitis	153		
• BCG Adenitis: Histopathology	153		
• Disseminated BCGosis with Cutaneous Granulomatous Dermatitis	153		
• Recurrent Pulmonary Infections	154		
• Repeated Lower Respiratory Tract Infection and Absence of Thymic Shadow	154		
• Hemorrhagic Varicella	154		
• Liver and Skin Abscesses	155		
• Griscelli Syndrome	155		
• Severe Combined Immunodeficiency	156		
• Large Skin Ulceration without Abscess Formation	156		
• Recurrent Skin Abscesses	156		
• Pneumatocele	157		
• Persistent mucosal and Cutaneous Fungal Infections	157		
• <i>Pneumocystis jirovecii</i> Pneumonia	157		
• Scrofuloderma	158		
• Herpes Zoster	158		
• Axillary Lymphadenopathy	158		
• Oral Candidiasis	159
