

Contents

1. Introduction	1
<i>General Introduction</i>	1
<i>Basic Radiography</i>	2
<i>Basic Principles of Chest X-ray Interpretation</i>	9
2. Normal Chest X-Ray	12
<i>Normal Structures Seen in Chest X-ray—A Brief Description</i>	12
<i>Introduction</i>	12
<i>The Lungs and Fissures</i>	12
<i>Some Useful Signs in Chest X-ray Interpretation</i>	22
3. Lung Opacity and Lung Lucency	29
Lung Opacity	29
<i>Introduction</i>	29
<i>Unilateral Lung Opacity</i>	30
<i>Lobar Collapse Series</i>	37
<i>Collapse/Atelectasis</i>	37
<i>Collapse of Individual Lobes</i>	43
<i>Hilum Based Opacity</i>	57
<i>Bilateral Lung Opacity</i>	60
Lung Lucency	64
<i>Lung Lucency—Unilateral Involving Whole Lung</i>	64
<i>Lung Lucency—Unilateral Involving Part of Lung</i>	65
<i>Bullous Emphysema</i>	70
<i>Bronchiectasis</i>	70
<i>Lung Lucency—Bilateral COPD</i>	72
4. Diseases of the Heart	75
<i>Criteria for a Normal Heart in Chest X-ray</i>	75
<i>Method of Measuring CTR in Chest X-ray</i>	76
<i>How to Read X-ray Chest in Cardiology?</i>	79
<i>Cardiac Shape—A Guide to Congenital Heart Disease</i>	84
<i>Cardiac Situs—A Guide to CHD</i>	87
<i>Coarctation of Aorta</i>	88
<i>Patent Ductus Arteriosus (PDA)</i>	89
<i>Ventricular Septal Defect (VSD)</i>	90
<i>Atrial Septal Defect (ASD)</i>	91
<i>Primary Pulmonary Hypertension</i>	92
<i>Bicuspid Aortic Valve</i>	93
<i>Mitral Regurgitation</i>	95
<i>Rheumatic Mitral Stenosis</i>	96
<i>Left Atrial Enlargement</i>	98

<i>Pericardial Effusion</i>	98
<i>Calcific Pericarditis</i>	99
<i>Dilated Cardiomyopathy</i>	100
<i>Congestive Heart Failure—CHF/CCF</i>	101
<i>Pulmonary Edema</i>	102
<i>Aortic Aneurysm</i>	103

5. Miscellaneous Lesions

105

<i>Rib Fracture</i>	105
<i>Cervical Rib</i>	106
<i>Complete Eventration of the Right Hemidiaphragm</i>	106
<i>Diaphragm Rupture</i>	108
<i>Diaphragmatic Hernia in a Child</i>	110
<i>Gas Under Diaphragm</i>	111
<i>Chilaiditi Syndrome</i>	112
