

Section 1: Fractures of the Femoral Head

- Femoral Head Fractures: An overview
- Operative management of femoral head fractures: Surgical dislocation of hip and screw fixation

Section 2: Fracture Neck of Femur

- Fracture neck of femur: An overview
- Osteosynthesis in fracture neck of femur: surgical technique and outcome
- Implant design in Total Hip Arthroplasty
- Cemented hip replacement in fracture neck of femur
- Cemented hip replacement in fracture neck of femur: The anterolateral approach.
- Uncemented total hip replacement in fracture neck of femur

Section 3: Intertrochanteric Femoral Fractures

- Intertrochanteric femoral fractures: An overview
- Sliding screw fixation for intertrochanteric fractures: operative technique and outcome
- Intramedullary fixation for intertrochanteric fractures: operative technique and outcome
- “Coxo-Femoral bypass”: prosthetic replacement for comminuted intertrochanteric fractures in the elderly

Section 4: Sub trochanteric Femoral Fractures

- Subtrochanteric femoral fractures: an overview
- Intramedullary fixation for subtrochanteric fractures: operative technique and outcome
- Subtrochanteric Fractures: minimally invasive extramedullary fracture fixation technique

Section 5: Special Scenarios

- Proximal femoral fractures in children
 - Periprosthetic Fractures of proximal Femur: Classification and treatment
- Pathological Fractures in proximal femur: Diagnosis and management
