

Contents

1. Introduction	1
<i>The Study of Radiology 1</i>	
2. Nature and Characteristics of Radiation	3
<i>Structure of An Atom 3; Nucleus 4; Electrons 4; Ionization 6; Isotopes 6; Particulate Radiation 6; Protons 7; Neutrons 7</i>	
3. Electromagnetic Radiation and Spectrum	9
<i>Quantum or Photons 10; Frequency and Wavelength 11; Characteristic Features of Electromagnetic Photon 11; Components of Electromagnetic Radiation 11; X-rays 12; Gamma Rays 13; Properties of Electromagnetic Radiations 13</i>	
4. Discovery, Production and Properties of X-rays	15
<i>Control Panel 16; Yoke 17; Extension Arm 17; Tube Head 18; X-ray Tube 19; X-ray Generating Apparatus 19; Anode 20; Line Focus Principle 21; Cathode 22; Production of High-speed Electrons 22; Focusing of Electrons 23; Transformers 23; Production of X-rays 25; Bremsstrahlung Radiation 26; Characteristic Radiation 27; Intensity and Inverse Square Law 30; Imaging Process 31; Reflection Imaging 32</i>	
5. Interaction of X-rays with Matter	33
<i>Attenuation 34; Attenuation Mechanisms 34</i>	
6. Radiation Biology	38
<i>Excitation 39; Ionization 39; Biological Effects of Radiation 39; Direct Effect 39; Indirect Effect 40; Free Radicals 40; Target Theories 40; Radiolysis of Water 40; Changes in Biological Molecules 41; Proteins 41; Nucleic Acids 41; Accumulated Damage 42; Cellular Effects 42; Nucleus 42; Chromosome Aberration 42; Cytoplasm 42; Factors Modifying the Cell Response 42; Biological Effects of Radiation (Somatic and Genetic) 43; Deterministic (Nonstochastic) Effects on Cells 44; Stochastic Effects 44; Genetic Stochastic Effect 45; Effects on Fetus/Unborn Child 45; Radiation Effects at the Tissue and Organ Level 45; Modifying Factors 45; Acute or Immediate Effects (Acute Radiation Syndrome) 45; Radiation Effect on Oral Tissues 46; Radiation Caries 47; Bone 48</i>	
7. Sources of Radiation and Radiation Protection	49
<i>Methods of Radiation Protection 50; X-ray Equipment 51</i>	
8. Radiographic Film and Its Properties	53
<i>Composition of X-ray Film 53; Film Base 54; Emulsion 54; Gelatin 54; Silver Halide 55; Contents of Intraoral Film Packet 56; Extraoral Films 58; Screen Films 58; Storage of Films 59; Intensifying Screens 59; Cassette 61</i>	
9. Infection Control in Dental Radiography	63
<i>Infection Control Procedures 64; Universal Precautions 64; Wearing Gloves for all Radiographic Procedures 65; Disinfect Working Surfaces and Cover X-Ray Machine, Chair and Lead Apron 65; Sterilize Non-disposable Instruments 67; Using Barrier Protected Film 67; Preventing Contamination of Processing Solutions 68; Panoramic and Cephalostat 68</i>	

10. Intraoral Radiography	70
<i>General Guidelines on Patient Care 71; Principles of Shadow Casting 71; Distortion 71; Periapical Radiography 72; General Considerations before Making an Exposure 73; Bisecting Angle Technique 74; Head Position of the Patient 75; Positioning of the Film 76; Angles for Maxillary and Mandibular Projections 77; Paralleling Technique/Right Angle Technique 80; Bitewing Radiography 86; Occlusal Radiography 88; Topographic or Standard Projection of the Anterior Maxilla 88; Lateral Maxillary Occlusal Projection 89; Maxillary True or Cross-sectional Projection (Vertex Occlusal) 89; Mandibular Topographic Projection 90; Mandibular True Occlusal or Cross-sectional Projection 90</i>	
11. Extraoral Radiography	93
<i>Standard Radiographic Projections 94; Radiographic Reference Planes/Points 95; The Canthomeatal Line (Orbitomeatal Line) 95; True Lateral Skull View 95; Lateral Projection for Nasal Bones 96; Cephalometric Projections 97; True Cephalometric Lateral Skull Projection 97; Cephalometric Posteroanterior View of the Jaws (Cephalometric PA Jaws) 99; Mandibular Lateral Oblique View 99; Mandibular Projection for Premolar/Molar Region 100; Mandibular Ramus Projection 100; Posteroanterior View, Posteroanterior Projection of the Skull (PA View of the Skull) 101; Posteroanterior View for Mandible (PA View for Mandible) 101; Reverse Towne's View 102; Water's Projection for Paranasal Sinus (PA View for Paranasal Sinus) 102; Submentovertex View 103; Temporomandibular Joint Radiography (TMJ Radiography) 104; Transcranial Projection 104; Transpharyngeal TMJ Projection 105; Transorbital View 106; Panoramic TMJ Projection 107; MRI of the TMJ 107</i>	
12. Panoramic Radiography	108
<i>Tomography 108; Curved Layer Tomography 109; Moving Rotational Centers 109</i>	
13. Processing and Mounting of Radiographic Films	117
<i>Processing Room/Dark Room 117; Location and Size 117; Safe Lighting 118; Film Fogging 119; Methods in Processing a Film 120; Composition of Developer Solution 127; Developer Replenisher 128; Rinse 128; Fixer 128; Fixing Solution 129; Washing 129; Drying 129; Film Mounting 129</i>	
14. Radiographic Errors	132
<i>Technique Errors Including Exposure Factors 132; Processing Errors 138; Film Handling Errors 141</i>	
15. Procedures of Radiographic Interpretation	145
<i>Localization 146; Observation 146; General Considerations 147; Interpretation 147; Conclusion 147; Describing A Lesion 148</i>	
16. Normal Anatomical Landmarks	154
<i>Normal Anatomy 154; Cementum 155; Pulp and Root Canal 155; Structures Common to Both Maxilla and Mandible (Radiolucent and Radiopaque) 156; Radiolucent Landmarks of Maxilla 159; Radiopaque Landmarks of Maxilla 164; Radiolucent Landmarks of Mandible 168; Radiopaque Landmarks of Mandible 171</i>	
17. Pathologic Calcification and Ossification of Soft Tissues	177
<i>Idiopathic Calcification 178; Sclerotic Bone 181; Phlebolith 181; Rhinolith 182; Antrolith 182; Dystrophic Calcification 183; Calcified Lymph Node 183; Pulp Stones 184; Calcified Acne Lesions 185; Calcification in the Walls of the Artery 185; Metastatic Calcification 185; Pathologic Ossification 185; Stylohyoid Ligament 185; Osteoma Cutis/Multiple Miliary Osteoma Cutis 186; Myositis Ossifications 186; Progressive Myositis Ossificans 187</i>	
18. Trauma to the Teeth and Facial Structures	189
<i>Fractures of the Facial Bones 190; Standard Radiographic Investigation of Facial Trauma 190; Nasomaxillozygomatic Complex 191; Mandible 191; Injuries to the Teeth 193; Injury to the Jawbones 196; Maxilla 197; Mandibular Fractures 198</i>	

19. Developmental Anomalies of Teeth	201
<i>Size of the Teeth 202; Number of Teeth 205; Supernumerary Teeth 206; Shape or Altered Morphology of Teeth 210; Fusion 211; Concrescence 212; Taurodontism 213; Dilaceration 215; Dens Invaginatus 215; Dens Evagination (Dens Evaginatus) 218; Enamel Pearl 218; Supernumerary Roots 220; Disturbances in Tooth Formation (Structure) 223; Amelogenesis Imperfecta 223; Generalized Hypoplasia 224; Generalized Hypomineralization 225; Hypomaturation 225; Hypomaturation/Hypo-calcification/Taurodontism 225; Dentinogenesis Imperfecta (Hereditary Opalescent Dentin) 226; Osteogenesis Imperfecta 227; Dentin Dysplasia 227; Regional Odontodysplasia (Odontogenesis Imperfecta, Ghost Teeth) 228; Eruption of Teeth 229; Transmigration 229; Transposition 229; Rotation 229; Hypercementosis 230</i>	
20. Periodontal Diseases	234
<i>Local Factors 235; Normal Radiographic Features of Healthy Alveolar Bone 235; Limitations of the Radiograph 238; Usefulness of Radiographs in Periodontal Diseases 240; Gingivitis 241; Periodontitis 241; Chronic Periodontitis 242; Radiographic Appearance of Periodontal Diseases 242; Early Radiographic Changes in Periodontitis 242; Aggressive Periodontitis 246; Necrotizing Ulcerative Periodontitis 246; Papillon-Lefèvre Syndrome 247; Systemic Diseases or Generalized Conditions Affecting Periodontium 248; Evaluation of Bone Defects 248; Furcation Involvement 248; Moderate to Severe Periodontal Lesions 248; Periodontal Abscess 248</i>	
21. Dental Caries	250
<i>Introduction 250; Interproximal Caries 251; Lamellar Caries 251; Incipient Caries 252; Dentinal Caries 252; Rampant Caries 253; Acute and Chronic Caries 253; Occlusal Caries 255; Pulpal Caries 257; Facial/Lingual Caries 258; Root or Cemental Caries 258; Recurrent or Secondary Caries 258; Arrested Caries 258; Radiographic Appearance of Caries 260</i>	
22. Inflammatory Lesions of the Jaws	267
<i>Acute Pulpitis 267; Chronic Pulpitis 268; Periapical Infections 268; Periapical Radiolucencies 269; Periapical Lesions, Sequela of Pulpitis 269; Acute Apical Periodontitis 270; Acute Apical Abscess (Acute Alveolar Abscess, Acute Dentoalveolar Abscess) 271; Chronic Alveolar Abscess (Chronic Apical Abscess) 274; Secondary Abscess (Phoenix Abscess) 276; Periapical Granuloma (Chronic Apical Periodontitis) 276; Rarefying Osteitis 278; Condensing Osteitis (Periapical Sclerosing Osteitis, Focal Sclerosing Osteomyelitis) 281; Osteosclerosis 283; Periapical Scar 285; Surgical Bone Defect 285</i>	
23. Cysts and Cyst-like Lesions of the Jaw	287
<i>Cysts of the Jaws 287; Odontogenic Cysts of Inflammatory Origin 288; Residual Periapical Cyst 295; Paradental Cysts 296; Lateral Periodontal Cyst 298; Botryoid Odontogenic Cyst 299; Dentigerous Cyst 299; Eruption Cyst 299; Dentigerous Cyst (Central, Lateral and Circumferential) 300; Buccal Bifurcation Cyst 305; Non-odontogenic Cysts 307; Aneurysmal Bone Cyst (ABC) 308; Simple Bone Cyst (Traumatic Bone Cyst, Solitary Hemorrhagic Cyst) 310; Stafne's Bone Cyst (Lingual Salivary Gland Depression) 311; Median Mandibular Cyst 313</i>	
24. Osteomyelitis	314
<i>Acute Suppurative Osteomyelitis (Pyogenic Osteomyelitis) 315; Chronic Osteomyelitis 316; Chronic Suppurative Osteomyelitis 317; Chronic Diffuse Sclerosing Osteomyelitis 320; Osteomyelitis with Proliferative Periostitis (Garre's Osteomyelitis, Periostitis Ossificans, Non-Suppurative Osteomyelitis) 322; Pericoronal Infections 324; Osteoradionecrosis 325</i>	
25. Benign Tumors of the Jaw	328
<i>Odontogenic Tumors 329; Ameloblastoma 330; Conventional Solid or Multicystic Intraosseous Ameloblastoma 330; Unicystic Ameloblastoma 333; Extraosseous/Peripheral Type of Ameloblastoma 334; Desmoplastic Ameloblastoma 334; Adenomatoid Odontogenic Tumor (Adenoameloblastoma) 335; Calcifying Epithelial Odontogenic Tumor (Pindborg Tumor) 337; Squamous Odontogenic Tumor 339; Keratocystic Odontogenic Tumor (Odontogenic Keratocyst) 340; Basal Cell Nevus Syndrome 342; Myxoma (Odontogenic</i>	

Myxoma, Myxofibroma 343; *Central Odontogenic Fibroma (Simple Odontogenic Fibroma, Odontogenic Fibroma)* 344; *Peripheral Odontogenic Fibroma* 345; *Mixed Epithelial Odontogenic Tumors* 345; *Ameloblastic Fibrodentinoma* 346; *Ameloblastic Fibro-odontoma* 347; *Mixed Tumors (of Odontogenic Epithelium, Odontogenic Ectomesenchyme)* 348; *Complex Odontoma (Complex Composite Odontoma)* 349; *Compound Odontoma (Compound Composite Odontoma)* 351; *Odontoameloblastoma* 353; *Cystic Odontoma* 354; *Calcifying Odontogenic Cyst or Calcifying Cystic Odontogenic Tumor* 354; *Dentinogenic Ghost Cell Tumor* 355; *Osteoma* 356; *Gardner's Syndrome* 358; *Osteoid Osteoma* 358; *Osteoblastoma* 359; *Benign Cementoblastoma (Cementoblastoma, True Cementoma)* 360; *Chondroma* 362; *Hemangioma and Vascular Malformations* 362; *Central Hemangiomas/Intrabony Vascular Malformations* 363

26. Malignant Diseases Affecting the Jaws	365
<i>Borders of the Lesion</i> 366; <i>Adjacent Cortical Bone</i> 366; <i>Radiodensity</i> 366; <i>Effects on Surrounding Structures</i> 366; <i>Squamous Cell Carcinoma</i> 367; <i>Metastatic Malignancy (Secondary Malignancy)</i> 372; <i>Central Squamous Cell Carcinoma (Primary Intraosseous Carcinoma)</i> 374; <i>Squamous Cell Carcinoma Originating from Odontogenic Cysts</i> 375; <i>Central Mucoepidermoid Carcinoma</i> 376; <i>Maxillary Sinus Carcinoma</i> 377; <i>Sarcomas</i> 379; <i>Osteosarcoma</i> 380; <i>Fibrosarcoma</i> 383; <i>Chondrosarcoma</i> 384; <i>Ewing's Sarcoma</i> 386; <i>Leukemia</i> 387; <i>Multiple Myeloma</i> 388; <i>Non-Hodgkin's Lymphoma</i> 389; <i>Burkitt's Lymphoma</i> 390	
27. Fibro-osseous Lesions of the Jaws	392
<i>Fibrous Dysplasia</i> 392; <i>Monostotic Fibrous Dysplasia</i> 393; <i>Polyostotic Fibrous Dysplasia</i> 394; <i>Osseous Dysplasias (Cemento-Osseous Dysplasias)</i> 397; <i>Periapical Osseous Dysplasia</i> 398; <i>Florid Osseous Dysplasia</i> 402; <i>Familial Gigantiform Cementoma</i> 403; <i>Ossifying Fibroma</i> 404; <i>Juvenile Ossifying Fibroma</i> 406; <i>Cherubism</i> 408; <i>Giant Cell Tumor</i> 410	
28. Systemic Diseases Manifested in the Jaws	413
<i>Hyperparathyroidism</i> 413; <i>Scleroderma</i> 414; <i>Langerhans Cell Histiocytosis</i> 414; <i>Vanishing Bone Disease</i> 415; <i>Thalassemia</i> 417; <i>Sickle Cell Anemia</i> 419	
29. Localization Techniques	421
<i>Right Angle Technique (Miller's Technique)</i> 421; <i>Parallax Method (Clark's Rule, Tube Shift Method, Slob Rule) in the Horizontal Plane</i> 422; <i>Parallax in the Vertical Plane</i> 422; <i>Winter's Lines</i> 424	
30. Imaging of Salivary Glands	425
<i>Sialography</i> 425; <i>Normal Sialographic Appearance of Parotid and Submandibular Glands</i> 426; <i>Ultrasound Imaging</i> 427; <i>Magnetic Resonance Imaging</i> 427; <i>Magnetic Resonance Sialography</i> 427; <i>Computed Tomography</i> 428	
31. Specialized Imaging	429
<i>Digital Radiography</i> 429; <i>Computed Tomography</i> 430; <i>Magnetic Resonance Imaging</i> 431; <i>Positron Emission Tomography</i> 431; <i>Cone-Beam Computed Tomography</i> 431	
32. Important Concepts at a Glance, Definitions and Glossary	434
<i>Radiolucencies of the Jaws</i> 434; <i>Sequence of Radiologic Events</i> 437	
<i>Index</i>	443
