Contents

1.	Basics of Pain	1
	Nociception and Nociceptive Pathways 1 Classification of Pain 6 Effects of Untreated Pain 11	
2.	Assessment of a Patient with Pain	14
	History 14 Examination 15 Chronic Pain Assessment Tools 19	
3.	Pharmacotherapy of Pain	29
	Paracetamol 29 Nonsteroidal Anti-inflammatory Drugs 31 Skeletal Muscle Relaxants 34 Opioids 36 Adjuvants 41 Steroids 45 Radiocontrast Agents 49 Local Anesthetics 49 Neurolytic Agents 51 Placebo and Nocebo Effects 52	
4.	Radiological Assessment of a Patient in Pain	55
	X-ray/Radiograph/Roentgenograph 55 Magnetic Resonance Imaging 56 Computed Tomography 58 Ultrasound Scan 58 Upper Limb 59 Lower Limb 62	
_		
5.	Acute Pain	71
5.	Acute Pain Prevalence 71 Causes 71 Factors Influencing Pain 72 Pathophysiology 72 Characteristics 72 Effects of Untreated Acute Pain 72 Assessment of Pain 73 Treatment 74 Assessing Treatment Outcome 77 Progression of Acute to Chronic Pain 78	71

6.	Headache	84
	Epidemiology 84 Classification 84 Pathophysiology 85 History and Physical Examination 85 Investigations 87 Acute Headache 88 Primary Headaches 90 Secondary Headache Disorders 94	
7.	Facial Pain	97
	Classification 97 Treatment 97 Temporomandibular Disorders 98 Trigeminal Neuralgia 99 Idiopathic or Atypical Facial Pain 100 Glossopharyngeal Neuralgia 100 Postherpetic Neuralgia 101 Occipital Neuralgia 101 Hemifacial Spasm 102	
8.	Backache	104
	Epidemiology 104 Anatomy of Spine 104 Etiology and Risk Factors 106 Functional Back Pain Assessment 106 Examination of Spine 107 Investigations 111 Treatment 112 Specific Conditions of the Back 116	
9.	Abdominal Pain	132
	Types 132 Etiology and Clinical Features 132 History 135 Physical Examination 135 Investigations 135 Management 136 Treatment 137	
10.	Chronic Pelvic Pain	139
	Incidence 139 Etiology 139 Pathogenesis 140	

	History 140 Physical Examination 140 Management 140 Investigations 140 Treatment 141 Resistant Chronic Pelvic Pain 141	
11.	Myofascial Pain	143
	Myofascial Pain Syndrome 143 Fibromyalgia 147	
12.	Musculoskeletal Pain	153
	Pain along Shoulder Joint 153 Pain along Elbow 158 Pain along Wrist/Hand 161 Pain in the Foot 163	
13.	Arthritis	167
	Anatomy of the Joint 167 Types 167 Clinical Features 168 Investigations 168 Treatment 168 Osteoarthritis 169 Rheumatoid Arthritis 170 Gouty Arthritis 173 Other Forms of Arthritis 175	
14.	Neuropathic Pain	177
	Neuropathic Pain 177 When to Refer to a Pain Specialist? 185 Diabetic Neuropathy 185 Complex Regional Pain Syndrome 187 Postherpetic Neuralgia 191 Carpal Tunnel Syndrome 193 Phantom Limb Pain 195	
15.	Cancer Pain	201
	Symptoms in Cancer 201 Approach to Cancer Pain 202 Treatment Guidelines 203 Methods of Cancer Pain Management 203	
16.	Peripheral Vascular Disease	210
	Etiology and Risk Factors 210 Pathophysiology 211	

	Diseases Coexisting with PVD 211 Clinical Features 211 Investigations 212 Treatment 212	
17.	Emergencies in Pain Practice	213
	Various Emergencies 213 Management of Complications 214	
18.	Pediatric Pain Management	217
	Causes of Pain in Children 217 Assessment of Pain 217 Treatment of Pediatric Pain 221	
19.	Osteoporosis	225
	Statistics 225 Classification 226 Causes 227 Pathophysiology 228 Symptoms and Signs 229 Evaluation/Investigations 229 Treatment of Osteoporosis 230 Prevention/Risk Reduction 235	
20.	Physiotherapy and Rehabilitation	238
	Physiotherapy 238 Rehabilitation 241	
21.	Interventions in Pain Management Practice	242
	Interventional Techniques 242 Advanced Interventional Techniques 243 Head and Neck Procedures 243 Spine Procedures 248 Interventions in the Abdomen 255 Neurolytic Techniques in Pain Management 257
