

Contents

1. Setting-up Pediatric Nephrology Services	1
<i>Kishore Phadke</i>	
2. Urinary Bladder Catheterization	4
<i>Subal Kumar Pradhan, Kanishka Das</i>	
• Indications 4 • Contraindications 5 • Types of Bladder Drainage Systems 5 • Catheter Features 6	
• Drainage Bags 8 • Procedures 9 • Catheter Care 10	
• Common Problems with Urethral Catheterization 11	
• Removing a Catheter 11	
3. Suprapubic Aspiration for Urine Collection	12
<i>Jyoti Sharma</i>	
• Indications and Advantages 12 • Contraindications 12	
• Materials Required 12 • Postprocedure Care 13	
4. Urinalysis	14
<i>Urmila Anandh, Varsha Vadera, Shiva Priya Eswaran</i>	
• Methods of Urine Collection 14 • Routine Analysis of the Urine 15 • Microscopic Examination of Urine 17	
• Biochemical Analysis of Urine 24 • Urine Culture 25	
• Automated Urinalysis Methodologies 25	
5. Hemodialysis Catheter Placement in Children	27
<i>Valentine Lobo</i>	
• Classification of Catheters 27 • Sizes of Catheters 29	
• Insertion of Dialysis Catheter 30 • Optional 35	
• Care of a Catheter (as per the Indian Society of Nephrology Guidelines for Minimum Hemodialysis) 42 • Measures to Prevent Access Dysfunction 43 • Preparation of Antibiotic Catheter Locks 43 • Treatment of Complications in Temporary Access 43 • “Push-Lock” Protocol with Urokinase 44 • High Dose Protocol 44	
6. Dialyzers, Hemodialysis Circuit including Writing Acute Prescription	46
<i>Rajiv Sinha, Mordi Mourah</i>	
• Conditions where Hemodialysis might be Preferred 46	
• Difficulties in Acute Hemodialysis 46 • Equipment 46	

xii Practical Procedures in Pediatric Nephrology

- Simplified Physiology of Hemodialysis 48
- Prescription 48 • Appendix 51

7. Sustained Low-efficiency Dialysis in Children **53**

Valentine Lobo

- Definition 53 • Indications for Sustained Low-efficiency Daily Dialysis 53 • Machines for Sustained Low-efficiency Daily Dialysis 55 • Prescription for Sustained Low-efficiency Daily Dialysis 60
- Monitoring of Sustained Low-efficiency Daily Dialysis 61
- Drug Dosing Adjustments during Sustained Low-efficiency Daily Dialysis 61 • Innovations with Sustained Low-efficiency Daily Dialysis 61

8. Plasmapheresis **63**

A Saha, A Iyengar

- Indications 63 • Technique 64 • Vascular Access 64
- Filter Selection 64 • Extracorporeal Volume 65
- Anticoagulation 65 • Estimation of Plasma Volume 65
- Kaplan Formula 65 • Replacement Solution 66
- Complications 66 • Strategies to Avoid Complications 66
- Schedule of Plasmapheresis in Few Common Indications 67

9. Acute Peritoneal Dialysis **69**

Aditi Sinha

- Indications and Choice of Modality 69 • Catheters for Peritoneal Access 70 • Procedure 71 • Prescription 72
- Monitoring 72 • Complications 73

10. Chronic Peritoneal Dialysis Catheter Placement and Care **75**

Rajiv Sinha, Subhasis Saha

- Preparation Prior to Peritoneal Dialysis Catheter Insertion 75 • Catheter Selection 75 • Insertion of Catheter 76 • Post-insertion Peritoneal Dialysis Catheter Care and Exit Site Care 77 • Complications of Peritoneal Dialysis Catheters 78

11. Continuous Renal Replacement Therapy: Basics and Prescriptions **80**

Smriti Rohatgi, Sidharth Kumar Sethi

- Principles 80 • Indications 81 • Modes 81
- Prescriptions 83 • Anticoagulation 83
- Complications 84

12. Micturating Cystourethrogram	86
<i>Subhasis Saha, Rajiv Sinha</i>	
• What is it? 86 • Indications 86 • Procedure 86	
• Possible Adverse Effects 87 • Contraindications 88	
13. Ultrasonography and Magnetic Resonance Urography of the Kidneys, Ureters, Bladder	89
<i>Priscilla Joshi, Jyoti Sharma</i>	
• Kidneys 91 • Hydronephrosis and Obstruction 91	
• Renal Stone Disease 99 • Diffuse Renal Parenchymal Disease in Renal Failure 99 • Echogenic Renal Pyramids 99	
• Wilms' Tumor 99 • Renal Cystic Disease 99	
• Renal Dysplasia 106 • Pyonephrosis 109	
• Renal Vein Thrombosis 111 • Bladder 111	
• Ureters 111 • Ureterocele 111	
14. Nuclear Medicine Procedures in Pediatric Nephrology	116
<i>Birendra K Das</i>	
• Renal Function Studies 117 • Static Renal Scintigraphy (DMSA Scan) 120 • Diuretic Renography 122	
• Vesicoureteric Reflux Study with Voiding Cystourethrogram (Radionuclide Micturating Cystography) 123	
• Testicular Scan 130	
15. Voiding Diary for Assessment of Voiding Disorders in Children	134
<i>M Kanitkar, SK Patnaik</i>	
• Voiding Diary 134 • Pitfalls 135	
• Types of Diaries 135	
16. Renal Biopsy	138
<i>Rajiv Sinha, Mordi Mourah</i>	
• Indications for Renal Biopsy 138 • Contraindications (Absolute/Relative) 139 • Prebiopsy Investigations 139	
• Sedation/Anesthesia 139 • Procedure 139 • Postbiopsy Observations 140 • Postbiopsy Complications 141	
17. Handling of Renal Biopsy Tissue	143
<i>S Gaur, N Kamath</i>	
• Tissue Sampling 143 • Allocation of Biopsy Sample 143	
• Handling of Renal Tissue 144	

18. Water Deprivation (and DDAVP) Tests **150**

Sushmita Banerjee

- Indication 150 • Prerequisites 150 • Precautions 151
- Interpretation 151

19. Blood Pressure Monitoring in Children **153**

Indira Agarwal

- Measurement 153 • Technique 153
- Ambulatory Blood Pressure Monitoring 155
- Definition of Hypertension 156 • White Coat Hypertension 156 • Few Definitions 165

20. Research Methodology and Biostatistics in Pediatric Nephrology **167**

Susan Uthup, Geetha S

- Research Protocol 167 • Formulating a Hypothesis 168
- Testing a Hypothesis 168 • Statistics 173
- Formulae for Variance 179

21. Drug Therapy in Kidney Disease **184**

Swasti Chaturvedi

- General Principles 184 • Pharmacokinetics 187
- Prescribing for a Patient with Kidney Disease 187
- Dosing of Individual Drugs 188

Index **203**
