<i>Foreword</i>	v
<i>Preface</i>	vii
<i>Dedication</i>	xii
<i>Acknowledgements</i>	xiii
Chapter 1 First principles	
1.1 Development of the eye	1
1.2 Anatomy and physiology of the eye	3
1.3 Optics	18
Chapter 2 Ophthalmology in practice	
2.1 History taking	21
2.2 Examination	24
2.3 Investigations	42
2.4 Diagnosis	43
2.5 Treatment	45
Chapter 3 Diagnostic algorithms	55
Chapter 4 Refractive apparatus	
4.1 Anatomy and physiology	67
4.2 Clinical scenario	68
4.3 Hypermetropia	70
4.4 Myopia	73
4.5 Astigmatism	75
4.6 Presbyopia	77
Chapter 5 Orbit	
5.1 Anatomy	81
5.2 Clinical scenario	82
5.3 Preseptal cellulitis and orbital cellulitis	85
5.4 Thyroid orbitopathy	87
Chapter 6 Eyelid and lacrimal apparatus	
6.1 Anatomy and physiology	93
6.2 Clinical scenarios	94
6.3 Entropion	99

6.4	Ectropion	101
6.5	Facial nerve palsy	104
6.6	Ptosis	107
6.7	Blepharitis	110
6.8	Chalazion	112
6.9	Eyelid malignancies	114
6.10	Acquired nasolacrimal duct obstruction	118

Chapter 7 Conjunctiva

7.1	Anatomy and physiology	123
7.2	Clinical scenario	123
7.3	Infective conjunctivitis	126
7.4	Allergic conjunctivitis	130
7.5	Subconjunctival haemorrhage	133

Chapter 8 Cornea and sclera

8.1	Anatomy and histology	137
8.2	Clinical scenario	138
8.3	Dry eye/tear film instability	140
8.4	Infectious keratitis	144
8.5	Scleritis and episcleritis	148

Chapter 9 Diseases of the lens

9.1	Anatomy and physiology	153
9.2	Clinical scenario	153
9.3	Cataracts	156
9.4	Cataract surgery	159

Chapter 10 Uvea

10.1	Anatomy	165
10.2	Clinical scenario	165
10.3	Anterior uveitis (iritis)	167
10.4	Posterior uveitis and intermediate uveitis	171

Chapter 11 Retinal disease

11.1	Anatomy and physiology	177
11.2	Clinical scenarios	178
11.3	Diabetic retinopathy	183
11.4	Hypertensive retinopathy	188
11.5	Retinal vein occlusion	190
11.6	Retinal artery occlusion and amaurosis fugax	193
11.7	Age-related macular degeneration	196

11.8	Retinal tears and detachment	199
11.9	Retinitis pigmentosa	202
11.10	Adult retinal tumours	205

Chapter 12 Optic nerve and visual pathways

12.1	Anatomy and physiology	211
12.2	Clinical scenarios	211
12.3	Angle closure glaucoma	220
12.4	Open angle glaucoma	224
12.5	Secondary glaucomas	231
12.6	Optic neuritis	231
12.7	Optic atrophy	238
12.8	Anterior ischaemic optic neuropathy	241
12.9	Papilloedema	247
12.10	Visual pathway defects	250

Chapter 13 Ocular motility and pupils

13.1	Terminology of ocular motility	255
13.2	Anatomy and physiology	256
13.3	Clinical scenarios	258
13.4	Third (oculomotor) nerve palsy	263
13.5	Fourth (trochlear) nerve palsy	266
13.6	Sixth (abducens) nerve palsy	269
13.7	Internuclear ophthalmoplegia	273
13.8	Non-paralytic strabismus	275
13.9	Nystagmus	277
13.10	Pupil disorders	279

Chapter 14 Paediatric ophthalmology

14.1	Embryology	283
14.2	Clinical scenario	283
14.3	Amblyopia	285
14.4	Retinopathy of prematurity	287
14.5	Retinoblastoma	290

Chapter 15 Trauma

15.1	Clinical scenario	293
15.2	Chemical injury	295
15.3	Corneal foreign body	299
15.4	Penetrating trauma	301
15.5	Blunt orbital trauma	304

	Index	309
