

## SECTION 1 CLINICAL SPECTRUM

- Clinical Spectrum of Cardiometabolic Disease
- Risk Factors for Cardiometabolic Disease
- Cardiometabolic Disease in Children
- New Genes for Type 2 Diabetes: Indian Scenario
- Stress and Cardiometabolic Disease
- Hypothyroidism and Cardiometabolic Disease
- Cardiometabolic Disease and Insulin Resistance in Obesity: Clinical Relevance
- Anemia and Cardiometabolic Disease: Management Strategies
- Endothelial Dysfunction in Atrial Fibrillation with Type 2 DM
- ACS, Cardiometabolic Disease, and Women
- Coronary Artery Disease in Diabetes: How Different is It from Nondiabetics?
- Cardiometabolic Disease and Heart Failure in the Elderly
- Prognosis of Heart Failure in Diabetes: Newer Perspectives
- Cardiometabolic Disease Management and STEMI: Prognostication
- Small Vessel CAD in Cardiometabolic Disease
- Cardiometabolic Disease and Deep Venous Thrombosis
- Pregnancy and Cardiometabolic Disease
- Cardiometabolic Disease and Autonomic Insufficiency
- Cardiometabolic Disease and Pulmonary Embolism: Is the Outcome Different?
- Cardiometabolic Disease and Cutaneous Manifestations
- Benidipine for Hypertension in Chronic Kidney Disease with Cardiometabolic Disease
- Cardiorenal Diabetes: Triple Jeopardy
- Contrast-induced Acute Kidney Injury
- Cardiometabolic Disease and Hypertension: Double Jeopardy
- Cardiometabolic Disease and Obstructive Sleep Apnea
- Cardiometabolic Disease and Mind-Heart Connection
- Aortic Aneurysm Surgery in Cardiometabolic Disease: Is the Outcome Different?
- Cardiometabolic Disease and Syncope
- Cardiometabolic Disease and Sexual Dysfunction
- Cardiometabolic Disease and Erectile Dysfunction
- Endothelial Cell Dysfunction in DM, HT and CAD, and Its Pathophysiology

## SECTION 2 DIAGNOSIS

- Current Status of Diabetic Cardiomyopathy
- Insulin Therapy and Cardiometabolic Disease
- Echo-guided CRT in Cardiometabolic Disease
- Echocardiography in Diabetes
- Echo/Doppler Assessment of Increased Left-sided Filling Pressures and Diastolic Heart Failure in Patients with Normal Systolic Function in Cardiometabolic Disease
- 3D Echo and Cardiometabolic Disease
- Emergency Echocardiography in Cardiometabolic Disease
- Diabetic Cardiomyopathy: Studies on Global Longitudinal Strain in Asymptomatic Diabetic Subjects
- Strain and Strain Rate Imaging in Cardiometabolic Disease
- Dobutamine Stress Echo for Coronary Artery Disease Evaluation in Diabetics
- Noninvasive Cardiovascular Imaging for Risk Assessment in Asymptomatic Diabetic Patients
- Value of Ankle–Brachial Index in Cardiometabolic Disease
- Computed Tomography Evaluation of Abdominal Arterial Wall Calcification in Patients with Type 2 Diabetes Mellitus

- Cardiac MRI: A Promise, Hope or Hype in Cardiometabolic Disease
- CT for CVD Evaluation in Cardiometabolic Disease
- Recent Advances in Nuclear Cardiology and Cardiometabolic Disease
- Blood Pressure Variability in Cardiometabolic Disease
- Central Aortic Blood Pressure Evaluation for Hypertension in Cardiometabolic Disease
- Telemedicine in Diabetes Management
- HbA1c: Clinical Relevance in Cardiometabolic Disease
- Emerging Role of Cardiac Troponin in Cardiometabolic Disease

### SECTION 3 MANAGEMENT STRATEGIES

- Role of Yoga in Cardiometabolic Disease
- Metabolic Effects of Antihypertensive Drugs
- Potential Role of Rosuvastatin in Cardiometabolic Disease
- Diabetic Hypertriglyceridemia: Management Strategies
- High-density Lipoprotein in Cardiometabolic Disease
- Glucose-lowering Strategies and Cardiovascular Outcomes
- Improving CV Outcomes in Diabetes with New Antidiabetic Medications: A New Era has Begun
- Positioning of Once Weekly GLP-1 based Therapies for Whom and When?
- DPP-IV Inhibitors beyond Glycemic Efficacy
- Insulin Therapy and Cardiometabolic Disease in Critical Care
- Lixisenatide: A Cardiometabolic Disease Perspective
- SGLT2-i Agents and Cardiovascular Diabetology
- SGLT2-i for the Reduction of Cardiovascular Events in High-risk Patients with Diabetes Mellitus
- Diabetes and Heart Failure: New Data on the Role of SGLT 2 Inhibitors— A Change of Concept?
- Bisoprolol: Is It Superior in Cardiometabolic Disease?
- Bisoprolol: A Choice of Beta Blocker in Hypertension and ACS in Cardiometabolic Disease
- Bisoprolol in Heart Failure in Cardiometabolic Disease
- Nebivolol for Hypertension in Cardiometabolic Disease
- ARB for Hypertension in Cardiometabolic Disease
- CKD and Hypertension: Is Benidipine Beneficial?
- Azilsartan: Promise and Power for Hypertension in Cardiometabolic Disease
- Benidipine for Hypertension in Cardiometabolic Disease
- Azilsartan: A Molecule of First Choice for Hypertension in Cardiometabolic Disease
- Superiority of Telmisartan: ARB, the First Choice in Cardiometabolic Disease
- ARNI in Heart Failure with Cardiometabolic Disease: The Way Forward
- Indapamide versus Hydrochlorothiazide versus Chlorthalidone in Cardiometabolic Disease
- Polypill for Cardiovascular Protection in Diabetes
- Clopidogrel in Patients of Diabetes with Acute Coronary Syndrome
- Acute Coronary Syndrome in Cardiometabolic Disease: Is It Different?
- Newer Drugs in Heart Failure and Changes in Our Clinical Approach
- Role of Oral Anticoagulants in Atrial Fibrillation with Cardiometabolic Disease
- Low-molecular-weight Heparin in Acute Coronary Syndrome in Cardiometabolic Disease
- Myocardial Bridging
- Benidipine for Hypertension in STEMI with Cardiometabolic Disease
- Thrombolytic Therapy of Choice in STEMI with Cardiometabolic Disease
- Tenecteplase and ST-elevation Myocardial Infarction with Cardiometabolic Disease
- Cardiometabolic Disease and Stroke
- Hemorrhagic Stroke and Cardiometabolic Disease
- Prognostication of STEMI in Cardiometabolic Disease

- Management of Hypertension in Diabetes: Special Consideration
- Benidipine: A New Calcium Channel Blocker for Management of Hypertension and Angina in Cardiometabolic
- Azilsartan for Hypertension Management in Cardiometabolic
- Need for Registry of Cardiometabolic in India
- Nonpharmacological Management of Cardiometabolic
- Maternal Diabetes Mellitus and Fetal Cardiac Malformations: Antenatal and Postnatal Management and Outcome
- Role of Enhanced External Counterpulsation: Future Perspectives

#### SECTION 4 NUTRACEUTICAL AND OBESITY CARE

- Role of Vitamin D as Cardioprotection Strategy: Hope or Hype?
- Omega-3 Fatty Acids and Cardiovascular Disease
- Role of Red Yeast Rice and Phytosterols in Dyslipidemia
- Meal Replacement Therapy for Obesity Care in Cardiometabolic
- Ideal Edible Oil in Cardiometabolic
- Cardiometabolic Diet

#### SECTION 5 ARRHYTHMIA MANAGEMENT

- Cardiometabolic and Heart Rate Variability
- Natural History of Atrial Fibrillation in Cardiometabolic: Is it Different?
- Atrial Fibrillation: Management Strategies in Cardiometabolic
- Ventricular Tachycardia in Heart Failure with Cardiometabolic
- Sudden Cardiac Death in Patients with Diabetes Mellitus: Prevalence, Predictors and Preventive Strategies
- Prevention of Sudden Cardiac Death in Cardiometabolic
- Pacing in Cardiometabolic
- Radiofrequency Ablation in Atrial Fibrillation in Cardiometabolic
- LA Appendage Closure for AF in Cardiometabolic: Is the Outcome Different?
- AICD after Cardiac Arrest in Cardiometabolic

#### SECTION 6 INTERVENTION

- Coronary Interventions in Cardiometabolic Prognostication
- Primary PCI for STEMI in Cardiometabolic: What is the Outcome?
- Optimizing Results of Percutaneous Coronary Intervention in Multivessel Disease with Diabetes
- STEMI Management in Diabetes Mellitus: Is it Different?
- CTO with STEMI in Cardiometabolic: Is the Outcome Different?
- Coronary Intervention in Venous Grafts in Diabetes
- Cardiometabolic and Peripheral Vascular Interventions
- Cardiometabolic and Vasculopathy
- Cardiometabolic and Carotid Artery Interventions
- Coronary Revascularization in Diabetics
- Endovascular Intervention in Stroke in Cardiometabolic: New Frontiers

#### SECTION 7 CARDIAC SURGERY

- Coronary Artery Bypass Grafting in Cardiometabolic
- Cardiac Surgery and Diabetes
- ECMO for Cardiometabolic

#### SECTION 8 REHABILITATION

- Cardiac Rehabilitation in Cardiometabolic
- Post-STEMI Intervention: Rehabilitation in Cardiometabolic
- Role of Nurses in a Structured Manner for Cardiac Rehabilitation in Cardiometabolic

#### SECTION 9 FUTURE DIRECTIONS

- Type 2 Diabetes and Coronary Artery Bypass Grafting: Relation and Outcomes
