

Table of Contents

- 1 Functional anatomy
- 2 Definition and classification of ocular surface disease
- 3 Definition and classification of dry eye disease
- 4 Epidemiology
- 5 Discrimination of subtypes
- 6 Clinical utility of objective tests
- 7 Tear dynamics and dry eye
- 8 Role of inflammation, inflammatory cytokines and ocular surface markers in DES
- 9 Effect of dry eye disease on vision
- 10 Contact lens-induced dry eye disease
- 11 Dry eye disease and glaucoma
- 12 Sjögren's syndrome and related conditions
- 13 Graft versus host disease
- 14 Computer vision syndrome
- 15 Anterior blepharitis
- 16 Episcleritis, scleritis and PUK
- 17 Thermal and chemical burns
- 18 Anterior corneal dystrophies
- 19 Pterygium and pinguecula
- 20 Ocular surface tumors
- 21 Conjunctivochalasia, lymphangiectasia and conjunctival concretions
- 22 Infectious conjunctivitis and keratitis
- 23 Ocular allergy
- 24 Limbal stem cell deficiency

- 25 Superior limbic conjunctivitis
- 26 Neurotrophic keratoconjunctivitis
- 27 Mechanical eyelid diseases
- 28 Artificial substitutes
- 29 Anti-inflammatories
- 30 Blood derivatives
- 31 Secretagogues
- 32 Immunosuppressants and biologic therapy
- 33 Androgens
- 34 Therapeutic contact lenses
- 35 Topical antibiotic, antifungal and antiviral drugs
- 36 Anti-allergics
- 37 Lacrymal punctal occlusion
- 38 Conjunctival and scleral flaps and corneal adhesives
- 39 Amniotic membrane
- 40 Desepithelization, sequential sectorial conjunctival epitheliectomy
- 41 Phototherapeutic keratectomy
- 42 Autologous limbal transplant and allogenic limbal transplant
- 43 Keratoprosthesis
- 44 Future prospects and trends
- Appendices
