

- Modified Broström procedure for lateral ligament reconstruction
- Lateral ligament reconstruction with fibular periosteal flap in chronic ankle instability
- Lateral ligament stabilization of the ankle: the Williams procedure
- Anatomical deltoid ligament repair
- Spring ligament reconstruction – surgical technique
- Open reduction and internal fixation of lateral malleolar fractures
- Open reduction and internal fixation of medial malleolar fractures
- The treatment of osteochondral lesions of the talus using ‘one-step’ bone marrow-derived cell transplantation
- Arthroscopic treatment of osteochondral lesion of the talus
- Subtalar joint arthrodesis
- Endoscopic and open calcaneoplasty
- Endoscopic treatment of os trigonum
- Accessory navicular bone excision
- Open plantar excision of Morton’s neuroma
- Minimally invasive surgery of hallux valgus
- Surgical treatment for osteochondrosis of the second metatarsal head (Freiberg disease or Koelher II disease)
- Endoscopic Achilles tenolysis
- Achilles tendon subcutaneous rupture repair with mini open technique
- Treatment of calcific insertional achilles tendonitis
- Treatment for chronic mid-portion Achilles tendinopathy; the soleus transfer technique
- Retinaculum repair for recurrent peroneal tendon subluxation
- Surgical treatment of peroneal tendon lesions
- Posterior tibialis tendon reconstruction
- Management of posterior tibialis tendon dislocation
- Surgical release of plantar fasciitis
- Surgical release of the superficial peroneal nerve
