

- Reconstruction of ACL using bone-patellar tendon-bone autograft
- Reconstruction of ACL using hamstring autograft
- Reconstruction of ACL using iliotibial band autograft
- Reconstruction of ACL using quadriceps tendon autograft
- Reconstruction of ACL without foreign materials: bone dowel method
- Reconstruction of ACL with open physes
- Extra-articular lateral tenodesis for ACL deficient knee
- Reconstruction of the posterolateral corner
- Reconstruction of PCL using a single bundle graft
- Arthroscopic resection of the medial meniscus
- Arthroscopic treatment of a meniscal cyst
- Arthroscopic plasty of the discoid meniscus
- Arthroscopic meniscal repair: 'all-inside' method
- Reconstruction of MPFL using hamstring tendon autograft
- Reconstruction of MPFL with quadriceps tendon autograft
- Repair of acute quadriceps tendon rupture
- Surgery for patellar tendonitis: 'jumper's knee'
- Complete arthroscopic synovectomy
- Dynamic reconstruction of MPFL with hamstring tendon autograft
