

- Arthroscopic debridement of arthritic knee
- Arthroscopic fixation of distal detachment of ACL
- Arthroscopic treatment of tibial plateau fracture
- Trochlea osteotomy (Albee procedure) for patellar instability
- Repair of cartilage defects using osteochondral allograft
- Repair of cartilage defects using scaffold
- Repair of cartilage defects with microfracture surgery
- Repair of cartilage defects with mosaicplasty
- Distal femoral medial closing wedge osteotomy
- Distal femoral opening wedge osteotomy
- Excision of knee exostosis
- Extra-articular graft for osteochondritis dissecans
- Fixation of osteochondritis dissecans
- High tibial closing wedge osteotomy
- High tibial opening wedge osteotomy
- Lateral approach for distal femoral fracture reduction and fixation
- Medial approach for distal femoral fracture reduction and fixation
- Open fixation of tibial plateau fracture
- Open reduction and internal fixation of patella fractures
- Surgery for Osgood Schlatter disease
- Surgery for patella infera (baja)
- Proximal tibial tubercle transfer (surgery for patella alta)
- Distal tibial tubercle transfer for patellar instability
