

- Arthroscopic debridement for osteochondritis dissecans of the capitulum
- Arthroscopic fixation of osteochondritis dissecans of the capitulum
- Open treatment for lateral epicondylitis
- Repair of distal triceps tendon rupture
- Reconstruction of chronic distal triceps tendon rupture
- Repair of distal biceps tendon rupture
- Fixation of radial head fracture
- Replacement of radial head
- Fixation of olecranon fracture
- Distal humerus fracture fixation for intra-articular fractures
- Reduction and fixation of humeral distal shaft fracture in children
- Acute repair after elbow dislocation
- Arthroscopic debridement for posteromedial impingement
- Surgical treatment of chronic posterolateral instability
- Surgical treatment of chronic medial instability
- Open debridement for elbow arthritis
- Arthroscopic arthrolysis for elbow arthritis
- Elbow arthroplasty without bone loss
- Arthroscopic treatment of olecranon bursitis
