Section 1: Fundamentals

1

- 1. Basic Physics with Biomechanical Perspective** 3
 - Force 3
 - Force Systems 5
 - Force Couple 7
 - Composition of Forces 8
 - Resolution of Forces 9
 - Human Motion 10
 - Angular Motion 12
 - Newton's Law of Motion 12
 - Torque (Moment of Force or Moment) 13
 - Practical Application of Torque 14
 - Friction 14
 - Gravity 15
 - Equilibrium 18
 - Work, Energy, and Power 19
 - Energy 19
 - Power 20
 - Springs 20
 - Levers 21
 - Levers in Human Body 22
 - Elasticity 23
 - Pulleys 27
 - The Patella as an Anatomic Pulley 27
- 2. Joint Structure and Function** 29
 - Classification of Joints 29
 - Joint Motion 33
 - Concave Convex Rule 33
 - Joint Stability 34
 - Effect of Disease on the Joints 36
 - Effects of Injury on the Joints 37
 - Effects of Immobilization on the Joints (Stress Deprivation) 37
 - Effects of Exercise 37

- 3. Connective Tissue Structure and Function** 39
 - Collagen 40
 - Specific Connective Tissue Structures 40
 - General Properties of Connective Tissue 45
- 4. Muscle Structure and Function** 48
 - Types of Muscles 48
 - Structure and Function of Skeletal Muscle 49
 - Generation of Cross-bridge Interaction 52
 - Skeletal Muscle and Exercise 52
 - Muscle Function 57
 - Classification of Muscle 58
 - Effect of Immobilization, Injury, and Aging 60

Section 2: Joint Segments in Detail

63

- 5. Temporomandibular Joint** 65
 - Osteology 65
 - Arthrology 66
 - Stabilization 67
 - Capsule and Ligaments 68
 - Osteokinematics and Arthrokinematics 70
 - Arthrokinematics 72
 - Kinetics 72
 - Pathomechanics/TMJ Disorders 73
- 6. Shoulder Joint** 75
 - Joints at the Shoulder Complex 75
 - Stabilization 76

• Kinematics 79	
• Kinetics 80	
• Pathomechanics 82	
• Scapulothoracic Joint 83	
• Acromioclavicular Joint 85	
• Sternoclavicular Joint 88	
7. Elbow Complex	91
• Humeroulnar Joint and Humeroradial Joint (True Elbow Joint) 91	
• Kinematics 93	
• Kinetics 94	
• Superior Radioulnar Joint 94	
• Kinematics 95	
• Kinetics 96	
• Special Feature of Elbow 96	
• Pathomechanics 96	
8. Wrist and Hand Complex	98
• The Wrist Complex 98	
• Osteology 99	
• Arthrology 99	
• Joints of Wrist 99	
• Wrist Ligaments 102	
• Kinematics of Wrist 104	
• Kinetics 106	
• Pathomechanics 108	
• The Hand Complex 110	
• Arches of Hand 110	
• Joints of the Hand 112	
• Kinematics and Kinetics 113	
• Prehension 118	
9. Hip Joint	121
• Hip Segment and the Parts 121	
• Stability 122	
• Kinematics 124	
• Pathomechanics 130	
• Angles in the Hip Segment 130	
• Hip Joint Forces and Muscle Function in Stance 133	
10. Knee Joint	136
• Structure of Tibiofemoral Joint 136	
• Menisci 138	
• Joint Capsule 139	
• Ligaments 140	
• Tibiofemoral Joint Function 143	
• Role of Cruciate Ligaments and Menisci in Flexion and Extension 146	
• Muscles 148	
• Patellofemoral Joint 151	
11. Ankle and Foot Complex	154
• Joint Structure of Ankle and Foot Complex 154	
• Forces in the Ankle Joint Complex 157	
• Pronation and Supination Twist 158	
• Metatarsophalangeal Joint 159	
• The Metatarsal Break 159	
• Interphalangeal Joint 160	
• Plantar Fascia 160	
• Arches of Foot 160	
12. Vertebral Column	163
<i>Cervical Spine 165</i>	
• Parts 165	
• Structure 165	
• Joints 166	
• Kinetics 167	
<i>Thorax and Chest Wall 167</i>	
• General Structure and Function 167	
• Ribs 170	
• Articulations of the Rib Cage 171	
• Kinematics of Rib Cage and Manubriosternum 173	
• Muscles Associated with Rib Cage 173	
• Developmental Aspects of Structure and Function 176	
<i>Lumbar Segment 176</i>	
• Types of Vertebra and its Structure 176	
• The Joints in the Lumbar Segment 178	
• Stability of the Lumbar Spine 179	
• Kinematics 181	
• Arthrokinematics 183	
• Kinetics 184	
• Lumbopelvic Rhythm 184	
• Thoracolumbar Fascia 186	
• Lumbosacral Joint 187	

- Pathomechanics 187
- Muscles of Trunk Region 189

Sacroiliac Joint 189

- Stability 190
- Joint Structure 190
- Kinematics 191
- Kinetics 192
- Pathomechanics 192
- Symphysis Pubis 192
- Sacrococcygeal Joint 193

Section 3: Analytical Biomechanics 195

13. Posture 197

- Definition 197
- Static and Dynamic Posture 197
- Active Posture 199
- Inactive Posture 199
- Postural Control 200
- Muscle Synergies 201
- Kinetics and Kinematics of Posture 202
- Optimal Posture 203
- Analysis of Sitting Postures 213
- Different Technique/Instruments Used for Measurement of Posture 216
- Appropriate Clothing 217
- Evaluation of Posture 217
- Pathomechanics/Faulty Posture 218
- Musculoskeletal Changes During Pregnancy 220

14. Gait 224

- Stance Phase 225
- Swing Phase 226
- Parameters that Describe Gait Patterns 227
- Determinants of Gait Cycle During Ambulation 229
- Kinematics of Gait 231
- Kinetics of Gait 231
- Gait Analysis in Relation to Hip Joint 232

- Pathological Gait 234
- Treadmill Gait 236
- Stair Climbing Gait 236
- Gait Laboratory 237
- Gait Analysis Systems 238

15. Movement Analysis in Activities of Daily Living 243

- Squatting 243
- Movement Analysis of Lifting 247
- Movement Analysis of Sit-to-stand 249
- Sitting 253
- Movement Analysis of Breathing 260

16. Movement Analysis in Sporting Activities 263

- Throwing and Striking 263
- Jumping 266
- Biomechanics of Running 266
- Jogging 271
- Kabaddi 271
- Biomechanical Analysis of Gymnastics 273
- Kicking 276
- Push Ups 277
- Pull Ups 277
- Swimming 278
- Cycling 278
- Wicket Keeping 280
- Biomechanics in Dance 280

17. Goniometry 283

- Definition 283
- Principles of Goniometry 283
- Types 284
- Measuring of ROM in Upper Extremity 287
- Measuring of ROM in Lower Extremity 292

18. Walking Aids 298

- Indications 298
- Classification of Walking Aids 298
- Canes 301
- Walker 302

19. Orthotics and Prosthetics	304	
• General Classification	304	
• Common Internal Fixators	305	
• Biomechanical Principle of Orthosis	305	
• Spinal Orthosis	305	
• Upper Extremity Orthosis (Splint)	307	
• Lower Extremity Orthosis	307	
20. Ergonomics	310	
• Ergonomics of Desk Job	310	
• Prevention	311	
• Ergonomic Chair	312	
• Precautions While Sitting	313	
		• Ergonomics of Sitting 314
		• Ergonomics of Driving 314
		• Ergonomics of Standing Job 315
		• Ergonomics of Lying Down/ Sleeping 315
	21. Starting and Derived Positions for Exercise	316
	• Standing	316
	• Kneeling	321
	• Sitting	322
	• Lying	324
	• Hanging	325
	<i>Index</i>	329
