## Contents

| Chapter 1: | Introduction  | 1  |
|------------|---|----|
|            | About this Book 1   |    |
| Chapter 2: | Components of Phaco Machine                                   | 2  |
|            | Parts of Phaco Machine 2                                      |    |
|            | Key Points 12   |    |
| Chapter 3: | Energy  | 13 |
|            | Definition 13   |    |
|            | Principle 13  |    |
|            | Longitudinal Phaco (Traditional Phaco) 13                     |    |
|            | Types of Delivery System of Energy 14                         |    |
|            | Different Modes of Energy 14                                  |    |
|            | Modified Modes of Energy 23                                   |    |
|            | Combination of Longitudinal and Transverse Forms of Energy 26 |    |
|            | Key Points 27   |    |
| Chapter 4: | Vacuum  | 28 |
|            | Principle 28  |    |
|            | Uses of Vacuum 29   |    |
|            | Different Settings of Vacuum 29                               |    |
|            | Delivery System of Vacuum 33                                  |    |
|            | Key Points 34   |    |
| Chapter 5: | Aspiration Flow Rate  | 35 |
|            | Principle 35  |    |
|            | Uses 35   |    |
|            | Different Settings of Flow Rate 36                            |    |
|            | Key Points 39   |    |
| Chapter 6: | Association of Energy Vacuum and Flow Rate                    | 40 |
|            | Important Factors Related to Association of Energy,           |    |
|            | Vacuum, and Flow Rate 40                                      |    |
|            | Key Points 45   |    |
| Chapter 7: | Torsional Technology  | 46 |
| -          | Principle 46  |    |
|            | Advantages 46   |    |

## xvi Contents

|             | Machine Features 47                             |    |
|-------------|---|----|
|             | Surgical Parameters 50                          |    |
|             | Disadvantages 54                                |    |
|             | Centurion Vision System 54                      |    |
|             | Key Points 55                                   |    |
| Chapter 8:  | Phaco Parameters in Different Types of Cataract | 56 |
|             | Modes 56  |    |
|             | Parameters in the Form of Chart 57              |    |
|             | Key Points 68                                   |    |
| Chapter 9:  | Troubleshooting                                 | 69 |
|             | Difficulties Occurring during Surgery 69        |    |
|             | Key Points 74                                   |    |
| Chapter 10: | Selection of Phaco Machine                      | 75 |
|             | Prerequisites 75                                |    |
|             | Key Points 76                                   |    |
| Instruments | Invented by Dr Navneet Toshniwal                | 77 |
| Index       |   | 79 |
|             |   |    |
