

Contents

SECTION 1. INTRODUCTION TO RADIOLOGY

1. Basics of Radiology	3
• Radiology Modalities 3 • Ionizing Radiation 3 • Nonionizing Radiation 4	
• X-rays 4 • Ultrasound 6 • The Three Main Types 10 • Beam Steering 11	
• Obstetric Ultrasound 12 • PC-PNDT Act 15 • Computed Tomography Scan 16	
• Magnetic Resonance Imaging 17	
2. Role of Contrast	20
• Types of Contrast Media 20 • Properties of Ideal Contrast Media 20	
• Side Effects and Reactions 20 • Prevention of Reactions 20	
• Treatment of Contrast-Mediated Adverse Reaction 21	
• Contrast Agents in Computed Tomography (Sometimes also Called Dyes) 21	
• Magnetic Resonance Imaging Contrast Agents 23	
3. Radiation Hazards and Protection	26
• Regulatory Body 26 • Sources of Radiation 26 • Radiation Hazards 26	
• Biological Effects of Radiation 28 • Principles of Radiation Protection 29	

SECTION 2. X-RAYS

4. Production and Properties of X-rays	37
• Basic Physics of X-ray Production 37 • Overview: How X-rays are Produced 37	
• Equipment for X-ray Production 37 • Producing an X-ray Beam 38	
• Factors Affecting X-ray Beam Quality and Quantity 41 • Properties of X-rays 41	
5. Special Contrast Procedures in X-rays	43
• Urinary System 43 • Female Genital Tract 47 • Male Genital Tract 49	
• Digestive System 49 • Biliary Tract 54 • Dacryocystography 55	
• Orbital Venography 56 • Sialography 56 • Nasopharyngography 56	
• Laryngography 56 • Bronchography 56 • Arthrography 56	
• Central Nervous System 56 • Diagnostic Visceral and Peripheral Angiography 57	
6. Synopsis of X-ray Positioning	59
• Summary of X-ray Positioning 59	
7. X-ray Films, Screens and Radiography	74
• Radiographic Cassettes 74 • Intensifying Screen 75 • X-ray Film 76	
• Grid 78 • Darkroom 79	
8. Recent Advances in X-rays	81
• Digital Radiography 81 • Working of Digital Radiography 82	
• Picture Archiving and Communication System (PACS) 83	
• Computed Radiography (CR) 83	

- 9. Miscellaneous Imaging Techniques..... 85**
- Soft Tissue Radiography 85 • Localization of Foreign Bodies 85

SECTION 3. MAMMOGRAPHY

- 10. Basics of Mammography 93**
- Mammography 93 • Introduction 93 • Breast Anatomy 93
 - Radiological Requirements for Mammography 93 • Standard Mammographic Views 94
 - Screen-film System 95 • Mammography X-ray Equipments 95 • Magnification Mammography 97
 - Digital Mammography 97 • Digital Breast Tomosynthesis 97

SECTION 4. COMPUTED TOMOGRAPHY

- 11. Computed Tomography Physics..... 101**
- Computed Tomography Methodology 101
 - Advantages of Computed Tomography Over Conventional Radiography 107
 - Disadvantages of Computed Tomography Over Conventional Radiography 107
 - Advantages of Computed Tomography Over Magnetic Resonance Imaging 107
 - Disadvantages of Computed Tomography Over Magnetic Resonance Imaging 107

- 12. Indications and Contraindications 110**
- Indications for Use of Computed Tomography 110 • Contraindications 112
 - Contraindications for the Use of Contrast Media 112
 - Relative Contraindications for the Use of Contrast Media 113
 - Contrast Medium 113 • Pressure Injectors 114

- 13. Patient Preparation, Positioning and Contrast Administration 118**
- Patient Positioning for Computed Tomography Scan 118 • Contrast 120
 - Guidelines for Screening and Prevention of Contrast-induced Nephropathy (CIN) 121
 - Computed Tomography: Abdomen and Pelvis 121 • Malignancy and Acute Pancreatitis 123
 - Routine Abdomen or Pelvis 123 • Routine Chest, Abdomen and Pelvis 124
 - Retroperitoneal Hemorrhage (AKA Non-Contrast Abdomen/Pelvis) 124 • Trauma 124
 - Computed Tomography Cystography 124 • Triple Phase Liver: Hepatocellular Carcinoma 125
 - Dual Phase Liver (Arterial, Portal Venous, Delay) 125 • Adrenal Mass 125 • Renal Mass 126
 - Renal Infection 126 • Renal Stone 126 • Renal Artery Stenosis 126
 - Renal Ureteropelvic Junction/Donor 127 • Computed Tomography Urography 127
 - Pancreatic Mass 127 • Computed Tomography Enterography 128
 - Computed Tomography Colonography 128 • Aortic Dissection 129
 - Aortic Aneurysm—Pre-Endovascular Stent 129 • Aortic Aneurysm—Post-Endovascular Stent 129
 - Computed Tomography Pelvis without Abdomen 129

- 14. Computed Tomography Anatomy 132**
- CT Head 132 • CT Neck 133 • CT Thorax 134 • CT Cardiac 135 • CT Abdomen 136

- 15. Basic Computed Tomography Pathologies 142**
- Head 142 • Brain Hematomas 142 • Ischemic Stroke 142 • Neurocysticercosis 143
 - Brain Tumors 143 • Cerebral Arteriovenous Malformation 146 • Brain Abscess 146
 - Metastasis to Brain 146 • Thorax 147 • Tuberculosis 147 • Occupational Lung Diseases 147
 - Bronchogenic Carcinoma 149 • Mediastinal Masses 149
 - Hepatobiliary System 150 • Gallbladder Carcinoma 150 • Cholelithiasis 151
 - Cholangiocarcinoma 151 • Hepatic Hemangioma 152 • Pancreas 153
 - Acute Pancreatitis 153 • Pancreatic Pseudocyst 154 • Computed Tomography Findings 155
 - Genitourinary Tract: Renal 155 • Urolithiasis (Urinary Tract Calculus) 155
 - Renal Cell Carcinoma 156 • Autosomal Dominant Polycystic Kidney Disease 156
 - Urinary Bladder 157 • Transitional Cell Carcinoma of the Bladder 157

16. Recent Advances in Computed Tomography	159
• Advances in Hardware 159 • Cone-Beam Computed Tomography Scanner 159	
• Helical and Multislice Computed Tomography Helical Computed Tomography 160	
• Multidetector Computed Tomography 161 • Dual Energy Computed Tomography 162	
• Positron Emission Tomography Scan 163 • CT Fluoroscopy 166	
• Electron Beam Tomography 166 • Computed Tomography Coronary Angiography 167	
• Computed Tomography Angiography 168	
17. Computed Tomography Guided Interventions.....	171
• Materials and Techniques 171 • Desirable Equipment 171	
• Computed Tomography-Guided Procedure: Steps 172 • CT Dosimetry 175	
• Main Risks and Complications of Computed Tomography-Guided Interventions 175	
• Pitfalls 175	
18. Computed Tomography Angiography.....	178
• Procedure of CT Angiography 178 • Pressure Injectors 181 • Indications 181	
• Contraindications 181 • Risk Factors 181 • Benefits 181 • Carotid Angiography 181	
• Subclavian Angiography 183 • Pulmonary Angiography 183 • Thoracoabdominal Aorta 183	
• Renal Angiography 183 • Computed Tomography Portography 183	
• CT Arteriography/CT Arteriportography 184	
19. Computed Tomography Artifacts	186
• Classification 186 • Motion Artifact 186 • Ring Artifact 186 • Noise 187	
• Beam Hardening and Scatter 187 • Partial Volume Artifact 188 • Photon Starvation 188	
• Metal Artifact 189 • Out of Field "Artifact" 189 • Tube Arcing 189	
• Cone-Beam (Multidetector Row) and Windmill (Helical) Artifacts 190	
• Future Perspective 190	

SECTION 5. MAGNETIC RESONANCE IMAGING

20. Magnetic Resonance Imaging Physics and MRI Sequences.....	195
• MRI System 195 • Components of MRI System 195 • Magnet 195	
• Shim Coils 197 • Gradient Coils 197 • Receiver Coils/Radiofrequency Transmitters 197	
• Time of Repetition and Time to Echo (TE) 198 • Computer 198	
• MRI Sequences 201 • Introduction 201 • MRI Principle 201	
• Proton Precession 202 • 5 Simple Steps 202 • Sequence Classification 202	
21. Indications, Contraindications, Patient Preparation and Positioning	206
• MRI 206 • Positioning and Patient Preparation 206 • Contrast Media Used in MRI 213	
• Enterography 214 • Enteroclysis 214 • Defecography 215	
22. Magnetic Resonance Imaging Anatomy.....	218
• MRI Brain 218	
23. Basic Magnetic Resonance Imaging Pathologies	232
• Bone Tumors 232 • Classification 232 • Introduction 232 • Basic View 232	
• Benign Bone Tumors 233 • Malignant Bone Tumors 237	
• Central Nervous System 240 • Dandy-Walker Malformation 240 • Arnold-Chiari Malformation 240	
• Intracranial Infections 240 • White Matter Disease 242	
• Intracranial Hemorrhage 243 • Hypoxic-Ischemic Encephalopathies 243	
• Intracranial Neoplasm 243 • Hepatobiliary System 247 Liver 247	
• Pancreas 254 • Spleen 256 • Common Bile Duct 257 • Gallbladder 258 • Portal Vein 259	
• Magnetic Resonance Imaging Thorax 261 • Mediastinum 261 • Aorta 262	
• Heart and Pericardium 263 • Shoulder Joint 265 • Rotator Cuff Tears 265	
• Knee Joint 269 • Indications of Knee Joint Magnetic Resonance Imaging 269 • Meniscal Tears 269	

- Cruciate Ligaments Injury 270 • **Wrist Joint 272** • Carpal Tunnel Syndrome 272
- Degenerative Diseases of Spine 274 • Spondylosis 274 • Disk Bulge 274
- Disk Herniation 274 • Trauma 275 • Tumors 275 • Metastatic Disease 276
- **Infection of Bones 278** • Tuberculosis 278 • Pyogenic Infections 280
- Infections of Spine 284 • Tuberculosis 284 • Pyogenic Infections 286

24. Recent Advances in the Field of Magnetic Resonance Imaging 289

- Functional Magnetic Resonance Imaging 289 • Magnetic Resonance Spectroscopy 290
- Magnetic Resonance Elastography 292
- Positron Emission Tomography–Magnetic Resonance Imaging 293
- Real-Time Magnetic Resonance Imaging 295
- Cardiovascular Magnetic Resonance Imaging 295

25. Magnetic Resonance Imaging Artifacts 300

- Artifacts 300 • Zipper Artifact 300 • Herringbone Artifact 301 • Zebra Stripes/Artifacts 301
- Moire Fringes 301 • Central Point Artifact 301 • Radiofrequency Overflow Artifact 302
- Shading Artifact 302 • Slice-Overlap Artifact 303 • Cross-Excitation Artifact 303
- Phase-Encoded Motion Artifact 303 • Entry Slice Phenomenon 304 • Black Boundary Artifact 304
- Magic Angle Artifact 304 • Magnetic Susceptibility Artifacts (Susceptibility Artifact) 305
- Chemical Shift Artifact or Misregistration 306 • Dielectric Effect Artifact 306

SECTION 6. MISCELLANEOUS

26. Radiotherapy 313

- Quantity of Radioactivity 313 • Radiation Source 313 • Linear Accelerator 314
- Radiosurgery 314 • Principles of Treatment 315 • Highly Sensitive Tumors 315
- Role of Radiotherapy in Cervical Cancer 316 • Role of Radiotherapy in Breast Cancer 316
- Radiotherapy in Ewing Sarcoma 317

27. Imaging in COVID-19 320

- Post-COVID-19 Sequelae 321
