

Contents

1. Basic Concept of Exercise Therapy	1
• Introduction to Exercise Therapy	1
• Mechanical Terms	1
• Stability of a Body	2
• Anatomical terms explaining motion	3
2. Axes and Planes	7
• Plane	7
• Axes	9
3. Simple Machines.....	11
Lever 11	
• Definition	11
• Parts of a Lever	11
• Classification of Lever	11
• Mechanical Advantage	12
• Anatomical Lever	13
• Uses of Lever in Physiotherapy	15
Pulley 16	
• Definition	16
• Anatomical Pulley	16
4. Movement and its Classification.....	18
• Muscle Pull on Bones	18
• Line of Pull	18
• Angle of Pull	18
• Ranges of Muscle Work	20
• Group Action of Muscle	20
• Classification of Movement	21
• Muscle Power	21
5. Passive Movement.....	23
• Classification	23
• Relaxed Passive Movement	24
• Procedure	24
• Effect and Uses of Passive Movement	35
• Indication and Contraindication of Passive Movement	35
• Continuous Passive Motion	36
6. Active Movement.....	38
• Definition	38
• Classification	38
• Close and Open Kinematic Chain Exercise	41
• Range of Motion Exercise	41

7. Resisted Exercise.....	42
• Types of Resistance	42
• Strength, Power, and Endurance of a Muscle	43
• Principles of Resisted Exercise	44
• Procedure for Performing Resisted Exercise	44
• Progressive-resisted Exercise	45
• Daily Adjustable Progressive-resisted Exercise	46
• Effect and Uses of Resisted Exercise	47
8. Free and Resisted Exercise of Individual Muscle Group.....	48
• Isometric Exercise	48
• Exercises for Upper Limb	49
• Exercises for Lower Limb	60
9. Types of Muscle Work	76
• Types of Muscle Work	76
10. Suspension Therapy.....	80
• Parts of Suspension Apparatus	80
• Types of Suspension	83
• Suspension of the Lower Extremity	85
• Suspension of Upper Limb	86
• Suspension of Trunk	88
11. End Feel	90
• Definition	90
• Types	90
• Significance of End Feel	91
• Restriction of Joint Range of Motion	91
• Causes of Restriction of Joint Range of Motion	92
12. Trick Movement	94
• Types	94
• Advantages of Trick Movement	95
• Disadvantages of Trick Movement	95
13. Goniometry.....	96
• Range of Motion	96
• Goniometer	96
• Uses of Goniometer	98
• Procedure for Measuring Joint Range of Motion	98
• Upper Extremity Goniometry	98
• Lower Extremity Goniometry	125
• Goniometry of Spine	135
14. Fundamental Starting and Derived Position.....	145
• Fundamental Starting Position	145
• Derived Position	145
• Standing	146
• Kneeling	156

- Sitting 158
- Lying 162
- Hanging 167

15. Assistive Devices of Gait..... 170

- Gait 170
- Phases of Gait Cycle 170
- Assistive Devices of Gait 171
- Types 172
- Precrutch Training 183

16. Limb Length Measurement 187

- Limb Length Discrepancy 187
- Classification 187
- Etiology 188
- Segmental Length Measurement 190
- Management for Limb Length Discrepancy 192

17. Pelvic Tilt 193

- Pelvic Movement 193
- Clinical Importance of Pelvic Tilt 197

18. Breathing Exercise and Postural Drainage 199

- Mechanism of Breathing 199
- Breathing Exercise 202
- Postural Drainage 209

19. Home Exercise 217

- Indication 217
- Essentials for Home Exercise 217
- Barriers to Home Exercise Program 218

20. Group Exercise 219

- Essentials for Group Exercise 219
- Assessment of Patient's Suitability for Group Treatment 219
- Preparation for Group Exercise 220
- Planning and Execution of Exercise Protocol 220
- Advantages of Group Exercise 221
- Disadvantages of Group Exercise 221
- Causes of Failure of Group Exercise 221

21. Apparatus Used in Physiotherapy 222

- Apparatus for Lower Limb 222
- Tools Used for Resisted Exercise 226
- Apparatus to Train Balance and Coordination 229
- Apparatus for Upper Extremity 231
- Perceptual and Motor Aids 236
- Apparatus for Gait Training 238
- Mobility or Ambulation Aid 240
- Therapeutic and Diagnostic Tools 241

22. Physiological Effect of Exercise	243
• Effect of Exercises on Cardiovascular System	243
• Effect of Exercises on Respiratory System	245
• Effect of Exercises on Musculoskeletal System	246
• Effect of Exercises on Endocrine System	247
• Effect of Exercises on Mental Health/Effect of Exercise on Emotions	248
• Pharmacological Effect of Exercise	249
23. Soft Tissue Manipulation and Massage	250
• Definition	250
• History of Massage	250
• Classification of Massage	251
• Effect of Massage	252
• Contraindication for Massage	254
• Preparation for Massage	255
• Different Techniques of Massage, their Effects, and Uses	256
• Massage for Upper Limb	272
• Massage for Lower Limb	273
• Massage for Back	275
• Massage to the Chest (for Respiratory Condition)	277
• Massage for Face	277
• New Techniques in Massage	278
24. Functional Re-education	279
• Functional Re-education/Mat Exercises	280
25. Relaxation	306
• What is Stress?	306
• Physiological Changes During Stress/Stress Reaction	306
• Elements of Relaxation Training	307
• Relaxation Techniques	309
26. Neuromuscular Coordination	315
• Coordination	315
• Factors Responsible for Coordination	316
• Test for Coordination	316
• Frenkel's Exercise	319
27. Posture	322
• Types	322
• Postural Mechanism or Postural Reflex	323
• Good and Bad Posture	324
• Factors Responsible for Development of Posture	325
• Postural Deviation	326
• Crawling Exercise	329
28. Stretching–Enhancing Muscle Extensibility	334
• Terminology Related with Stretching	335
• Physiological Effects of Stretching	336
• Indications of Stretching	336

- Contraindications of Stretching 336
- Neurophysiology Related to Stretching 337
- Mechanical Characteristics of Connective Tissue 338
- Determinants of Stretching 340
- Guidelines for Confirming Modes of Stretching Intervention 340
- Criteria of Evaluation of Patient Prior to Application of Stretching Intervention 340
- Application of Self-stretching Techniques 340
- Application of Mechanical Stretching Techniques 341
- Application of Manual Stretching Techniques 341
- Manual Stretching Techniques 341
- Lower Extremity Intervention 350
- Spine Stretching Interventions 355
- Self-stretching Intervention 358

29. Maintenance of Record..... 366

- Measurement of Volume of Limb 366

Question Bank 369

Bibliography 379
