

Contents

1. Anatomy	1
■ Pleurae	
■ The Lung	
■ Bronchial Tree	
■ Bronchopulmonary Segments	
■ The Bony Thorax and Lungs	
■ The Bony Cage and its Conditions	
■ Thorax and its Movements	
■ Respiration and its Muscles	
■ The Heart and ECG	
2. Physiology	28
■ The Respiration, Respiratory Centers, and Chemoreceptors	
■ Blood Pressure	
■ The Cough Reflex	
■ Breathing, Lung Compliance, and Airway Resistance	
■ The Diffusion, Ventilation, and Perfusion	
■ The Energy Expenditure	
■ Pulmonary Function Assessment	
■ Cardiovascular Stress Testing	
■ Arrhythmia and Syncope	
■ Syncope and its Management	
■ Electrocardiograph	
3. Cardiac Surgery: Closed Heart Conditions and their Physical Therapy Management.....	77
■ Acquired Conditions	
● Mitral Stenosis	
● Aortic Stenosis	
■ Congenital Conditions	
● Patent Ductus Arteriosus	
● Coarctation of Aorta	
■ Physical Therapy Management for Closed Heart conditions	
4. Cardiac Surgery: Open Heart Surgery Conditions and their Physical Therapy Management.....	91
■ Congenital Conditions	
● Atrial Septal Defect	
● Ventricular Septal Defect	
● Pulmonary Stenosis	
● Tetralogy of Fallot	
● Transposition of Great Vessels	
● Arteriovenous Malformation	

■ Acquired Conditions	
● Mitral Stenosis	
● Mitral Regurgitation	
● Aortic Stenosis	
● Aortic Regurgitation	
● Coronary Artery Disease or Ischemic Heart Disease	
● Angina Pectoris	
● Cardiac Failure	
■ Cardiac Rehabilitation Program for Acquired Open Heart Conditions	
5. Thoracic Surgery	123
■ Fracture Ribs	
■ Flail Chest	
■ Stove in Chest	
■ Pneumothorax	
■ Hemothorax	
■ Hemopneumothorax	
■ Lung Contusion and Laceration	
■ Pulmonary Laceration	
■ Injury to Heart, Great Vessels, and Bronchus	
■ Empyema	
■ Pulmonary Tuberculosis	
■ Pott's Disease/Pott's Paraplegia/Pott's Spine/Tuberculosis Spondylitis	
■ Tuberculoma	
■ Bronchiectasis Sicca	
■ Bronchostenosis	
■ Massive Hemoptysis	
■ Suppurative Lesions of the Lung	
■ Carcinoma of Lung	
■ Thoracic Surgery	
■ Postoperative Complications	
■ Incisions, Indications, Contraindications, and Complications	
■ Ventilators	
■ Preoperative Assessment and Management of a Patient Posted for Thoracotomy	
■ Pulmonary Rehabilitation	
■ Endotracheal/Endonasal Tubes	
6. Myocardial Infarction—Management and Physical Therapy Intervention	209
7. Chronic Obstructive Airway Disease—Management and Physical Therapy Intervention	218
8. Cardiac Rehabilitation.....	231

9. Pulmonary Rehabilitation	256
10. Cardiopulmonary Resuscitation	302
11. Relaxation Techniques	308
12. Breathing Control Techniques	312
13. Posture	317
14. Total Body Exercises, Muscles and their Functions.....	321
