

Contents

1. Basics of History Taking and Examination in Orthopaedics	1
• History Assessment in Orthopaedics	1
• Examination	10
2. Clinical Evaluation of Polytrauma and Acute Injury of Bones and Joints	18
• Polytrauma	18
• History	20
• General Assessment	22
• Local Examination	23
• Trauma-related Orthopaedic Emergencies	28
3. Clinical Evaluation of Diseased Long Bones and Joints	30
• History Taking in Long Bone Disease	30
• General and Systemic Examination	32
• Local Examination	32
• Differential Diagnosis	34
• Clinical Evaluation of Pathological Joints	39
4. Clinical Evaluation of the Shoulder Joint	50
• Surgical Anatomy and its Clinical Significance	50
• History and its Evaluation	51
• Examination	55
• Shoulder Examination Proforma	71
• Common Conditions Affecting Shoulder and their Salient Features	71
5. Clinical Evaluation of the Elbow Joint	76
• Relevant Surgical Anatomy and its Clinical Significance	76
• History and its Evaluation	79
• Examination	81
• Elbow Examination Proforma	92
• Common Conditions Affecting Elbow and their Salient Features	92
6. Clinical Evaluation of the Wrist and Hand	95
• Surgical Anatomy of the Wrist Joint and its Clinical Significance	95
• Surgical Anatomy of the Hand and its Clinical Significance	97
• History and its Evaluation	98
• Examination	103
• Wrist and Hand Examination Proforma	114
• Common Conditions Affecting Wrist-hand and their Salient Features	115

7. Clinical Evaluation of the Hip Joint	120
• Surgical Anatomy and its Clinical Significance	120
• History and its Evaluation	120
• Examination	125
• A Note on Abductor Mechanism and Trendelenburg Test	140
• Use of Cane in Hip Diseases	141
• Hip Examination Proforma	142
• Common Conditions Affecting Hip and their Salient Features	143
8. Clinical Evaluation of the Knee Joint	146
• Surgical Anatomy and Function of the Knee Joint	146
• History and its Evaluation	152
• Examination	155
• Knee Examination Proforma	173
• Common Conditions Affecting Knee and their Salient Features	174
9. Clinical Evaluation of the Foot and Ankle Joint	178
• Surgical Anatomy of Foot-ankle and its Clinical Significance	178
• History and its Evaluation	180
• Examination	184
• Foot-ankle Examination Proforma	196
• Common Conditions Affecting Foot-ankle and their Salient Features	197
10. Clinical Evaluation of the Spine	200
• Surgical Anatomy of Spine-spinal Cord and its Clinical Significance	200
• History and its Evaluation	205
• Examination	209
• Spine Examination Proforma	229
• Common Conditions Affecting Spine and their Salient Features	230
11. Clinical Evaluation of the Peripheral Nerves	236
• Surgical Anatomy of the Peripheral Nerve and its Clinical Significance	236
• History and its Evaluation	239
• Examination	241
• Peripheral Nerve Examination Proforma	270
• Common Deformities following Specific Nerve Injuries and Other Conditions	270
12. Clinical Evaluation of the Bone Tumors	272
• Classification of Bone Tumors	272
• History Taking in Bone Tumors	272
• Examination	276
• Bone Tumor Examination Proforma	279
• Important Bone Tumors (in Brief)	280

13. Clinical Evaluation of the Amputation Stump	283
• Indications for Amputation	283
• The Scheme of History Taking in a Patient with Amputation Stump	283
• Examination	285
• Amputation Stump Examination Proforma	289
14. Clinical Evaluation of Gait and Various Patterns of Gait	290
• Definition of Gait	290
• Phases of Gait	290
• Etiology of Gait Disturbance	290
• Commonly Encountered Gait Patterns	292
15. Clinical Evaluation of the Swelling, Scar, Sinus, and Ulcer	296
• History and Examination of a Swelling	296
• Examination	298
• History and Examination of a Scar	305
• History and Examination of a Sinus	307
• History and Examination of an Ulcer	309
