

Contents

Section 1: General

- 1. Procedure for Creating Standard Operating Procedures 3**
Introduction 3; Purpose 3; Benefits 4; Standard Operating Procedure Template Overview 4; Use of Standard Operating Procedures 6; Standard Operating Procedure Validation and Approval 6; Revision and Review Frequency 7; Document Control 7; Track and Archive Documents 7

Section 2: Blood Center Operation

Donor Selection, Phlebotomy and Apheresis

- 2. Predonation Counseling and Donor Registration 11**
Scope and Application 11; Responsibility 11; Materials Required 11; Procedure 12; Precaution 14; Record 14; Annexure 2.1 15; Annexure 2.2 21
- 3. Donor Screening for Hemoglobin (Copper Sulfate Solution Method) 28**
Scope and Application 28; Responsibility 28; Materials Required 28; Procedure 29; Interpretation 30; Record 30
- 4. Estimation of Hemoglobin of Donor (Sahli's Method) 31**
Scope and Application 31; Responsibility 31; Materials Required 31; Procedure 31; Interpretation 32; Record 32
- 5. Estimation of Hemoglobin (HemoCue Method) 33**
Scope and Application 33; Responsibility 33; Materials Required 33; Procedure 33; Interpretation 35; Record 35; Internal Quality Control 35
- 6. Donor Health Checkup 36**
Scope and Application 36; Responsibility 36; Activities 36; Materials Required 37; Procedure 37; Record 39; Annexure 6.1 40
- 7. Selection of Blood Bags for Blood Collection and Preparation of Components 50**
Scope and Application 50; Responsibility 50; Materials Required 50; Procedure 50; Record 51

8. Labeling of Blood Bag	52
Scope and Application 52; Responsibility 52; Materials Required 52; Procedure 52; Documentation 53	
9. Preparation of Phlebotomy Site	54
Scope and Application 54; Responsibility 54; Materials Required 54; Procedure 54	
10. Blood Collection and Counseling during Blood Donation	56
Scope and Application 56; Responsibility 56; Materials Required 56; Procedure 57; Classification of Adverse Donor Reactions 58; Counseling During Blood Donation 61	
11. Postdonation Care and Counseling	62
Scope and Application 62; Responsibility 62; Requirements 63 Procedure 63; Postdonation Counseling 63; Annexure 11.1 66; Annexure 11.2 67; Annexure 11.3 68; Annexure 11.4 69	
12. Management of Adverse Donor Reactions	71
Scope and Application 71; Responsibility 71; Medicines/ Materials Required 71; Management of Adverse Reactions 72; Record 73	
13. Assessing Suitability of Donor for Plateletpheresis	74
Scope and Application 74; Responsibility 74; Materials Required 74; Procedure 74; Record 75	
14. Plateletpheresis using a Blood Cell Separator (Dual Needle)	76
Scope and Application 76; Responsibility 76; Materials Required 76; Procedure 77; Record 94	
15. Plateletpheresis using a Blood Cell Separator (Single Needle)	95
Scope and Application 95; Responsibility 95; Materials Required 95; Procedure 96; Record 115	
16. Plateletpheresis using Blood Cell Separator (Trima Accel)	116
Scope and Application 116; Responsibility 116; Materials Required 116; Procedure 117; Record 124	
17. Plasmapheresis using an Automated Blood Cell Separator	125
Scope and Application 125; Responsibility 125; Materials Required 125; Procedure 126; Record 129	
18. Care of Platelet/Plasma Apheresis Donor during and after the Procedure	130
Scope and Application 130; Responsibility 130; Materials Required 130; General Care During Procedure 131; Complications 132; Postdonation Care 137	

Component Section

- | | |
|--|------------|
| 19. Blood Components Separation | 138 |
| Introduction 138; Components Preparation by Centrifugation of Whole Human Blood 138; Collection of Single Blood Component by Apheresis 141 | |
| 20. Preparation of Packed Red Blood Cells and Fresh Frozen Plasma using Double Blood Bag | 142 |
| Scope and Application 142; Responsibility 142; Materials Required 142; Procedure 142; Documentation 144 | |
| 21. Preparation of Blood Components (Packed Red Blood Cells, Fresh Frozen Plasma, and Platelets) using Triple Blood Bag | 145 |
| Scope and Application 145; Responsibility 145; Materials Required 145; Procedure 145; Documentation 148 | |
| 22. Blood Component Preparation by Buffy Coat Method using an Automated Component Extractor | 150 |
| Introduction 150; T-ACE II Plus 150; Archimede 151; Blood Component Preparation using T-ACE II Plus 152; Responsibility 153; Materials Required 153; Procedure 153; Do's and Don'ts for T-ACE II Plus 163; Do's and Don'ts for Operation of Cryofuge (6000i) 164 | |
| 23. Preparation of Cryoprecipitate | 166 |
| Scope and Application 166; Responsibility 166; Materials Required 166; Procedure 166; Documentation 167 | |
| 24. Preparation of Saline-washed Red Blood Cells | 168 |
| Scope and Application 168; Responsibility 168; Materials Required 168; Procedure 169; Documentation 169 | |
| 25. Labeling of Blood and Blood Components | 170 |
| Scope and Application 170; Responsibility 170; Materials Required 171; Procedure 171; Documentation 172 | |
| 26. Preservation of Blood and Blood Components | 173 |
| Scope and Application 173; Responsibility 173; Materials Required 173; Procedure 173; Documentation 175 | |

Immunohematology

- | | |
|---|------------|
| 27. Preparation of Red Cell Suspension | 176 |
| Scope and Application 176; Responsibility 176; Materials Required 176; Procedure 177; Documentation 178 | |

28. ABO Blood Grouping	179
Scope and Application 179; Responsibility 179; Materials Required 180; Procedure 180; Glass Slide or White Tile Method 181; Glass Test Tube Method 182; Interpretation 183; Discrepancies Between Cell and Serum Grouping Results 184; Precautions 184	
29. Rh Blood Grouping	185
Scope and Application 185; Responsibility 185; Materials Required 185; Procedure 187; Slide Method 187; Glass Test Tube Method 188; Albumin Method 188; Interpretation of Results 189	
30. Testing for Weak Rh D Antigen	190
Scope and Application 190; Responsibility 190; Materials Required 191; Procedure 191; Interpretation 192; Discrepancies and Problems 192; Resolution 193	
31. Antibody Screening	194
Scope and Application 194; Responsibility 194; Materials Required 194; Procedure 195; Interpretation 196; Antibody Identification 197; Crossmatch versus Antibody Screening 198; Documentation 199	
32. Pretransfusion Testing (Compatibility Testing)	200
Scope and Application 200; Responsibility 200; Materials Required 201; Procedure 201; Saline Method 202; Bovine Albumin Method 202; Enzyme Method 203; Indirect Antiglobulin Method 203; Interpretation 203; Documentation 205	
33. Direct Coombs Test/Direct Antiglobulin Test	206
Scope and Application 206; Responsibility 206; Materials Required 206; Procedure 207; Interpretation 208; Documentation 208	
34. Indirect Coombs Test	209
Scope and Application 209; Responsibility 209; Materials Required 209; Procedure 210; Interpretation 210; Documentation 210	
35. Saline Addition or Replacement Technique	211
Scope and Application 211; Responsibility 211; Materials Required 211; Procedure 211; Interpretation 212	
36. Absorption and Elution (for Weak Subgroups of A or B)	213
Scope and Application 213; Responsibility 213; Materials Required 213; Procedure 214; Interpretation 215	

37. Automation in Immunohematology	216
Conventional versus Automation in Immunohematology 216; Interpretation of Results 217; Operation of Analyzer 219	
38. Forward and Reverse Blood Grouping	226
Scope and Application 226; Responsibility 226; Materials Required 226; Procedure 227; Interpretation 227; Documentation 228; Annexure 38.1 229; Method using Semiautomated Workstation 230	
39. Major Crossmatch	232
Scope and Application 232; Responsibility 232; Materials Required 232; Procedure 233; Interpretation 233; Documentation 233; Quality Control Procedure 234; Annexure 39.1 235; Method using Semiautomated Workstation 236	
40. ABO, Rh Blood Grouping and Direct Antiglobulin Testing of Newborn	238
Scope and Application 238; Responsibility 238; Materials Required 238; Procedure 239; Interpretation 239; Documentation 240; Annexure 40.1 241	
41. Antibody Screening (with Pooled "O" Cells)	243
Scope and Application 243; Responsibility 243; Materials Required 243; Procedure 244; Quality Control Procedure 244; Interpretation 244; Documentation 244; Method using a Semiautomated Workstation 245	
42. Antibody Screening (with Three-cell Panel)	246
Scope and Application 246; Responsibility 246; Materials Required 246; Procedure 247; Quality Control Procedure 247; Interpretation 247; Documentation 247; Method using a Semiautomated Workstation 248; Procedure 248	
43. Direct/Indirect Coombs Test	249
Scope and Application 249; Responsibility 249; Materials Required 249; Procedure 250; Quality Control Procedure 250; Interpretation 250; Documentation 251; Annexure 43.1 252; Annexure 43.2 254; Method using Semiautomated Workstation 256	
44. Testing for Du Weak Antigen (Semiautomated Method)	258
Scope and Application 258; Responsibility 258; Sample and Materials Required 258; Procedure 258; Documentation 259	
45. Resolution of ABO Group Discrepancies	260
Scope and Application 260; Responsibility 260; Materials Required 260; Procedure 261; Resolving ABO Discrepancies 262; Annexure 45.1 270; Annexure 45.2 271	

46. Collection of Blood Sample for Grouping/Crossmatching	272
Scope and Application 272; Responsibility 272; Materials Required 272; Requirements For Blood Sample Collection 273; Procedure 274; Safety Precautions during Blood Sampling 276; Troubleshooting Guidelines 277; Labeling and Documentation 278	
47. Transfusion of Right Blood to Right Patient	280
Scope and Application 280; Responsibility 280; Materials Required 280; Procedural Issues 280; Don'ts for Blood Transfusion 285; Annexure 47.1 287; Annexure 47.2 291; Annexure 47.3 296; Annexure 47.4 299	
48. Workup of Transfusion Reaction	301
Scope and Application 301; Responsibility 301; Classification of Transfusion Reactions 302; Materials Required 302; Workup of Acute Adverse Transfusion Reaction Less than 24 Hours 303; Delayed Transfusion Reaction More than 24 Hours 307; Annexure 48.1 310; Annexure 48.2 313; Annexure 48.3 315; Annexure 48.4 316; Annexure 48.5 317; Annexure 48.6 318; Annexure 48.7 319	
49. Return of Blood/Blood Components	320
Scope and Application 320; Responsibility 320; Materials Required 320; Policy Guidelines 320; Procedure 321; Documentation 321	
50. Problems and Troubleshooting in Blood Centers	322
Introduction 322; Donor Area 322; Serology 324; Screening of Transfusion Transmissible Diseases 327; Blood Component Area 328; Summary 330	
Transfusion Transmitted Infections (TTIs)	
51. Anti-human Immunodeficiency Virus 1/2 Testing	332
Scope and Application 332; Responsibility 332; Rapid Test Kit Method 332; ELISA Method 334	
52. Hepatitis B Surface Antigen Testing	337
Scope and Application 337; Responsibility 337; Rapid Kit Method 337; ELISA Method 339	
53. Hepatitis C Virus Antibodies Testing	341
Scope and Application 341; Responsibility 341; Rapid Card Method 341; ELISA Method 343	
54. Venereal Disease Research Laboratory (VDRL) Testing	345
Scope and Application 345; Responsibility 345; Rapid Kit Method 345; ELISA (Syphilis Enzyme Immunoassay II Total Antibody) 347; Interpretation 349	

55. Immunodiagnostic Assay (Chemiluminescence) of Viral Markers and Syphilis	350
Scope and Application 350; Responsibility 350; Equipment and Materials Required 350; Procedure 351; Calculation and Interpretation of Results 355	
56. NAT Screening of Hepatitis C, Hepatitis B, and Human Immunodeficiency Viruses	357
Scope and Application 357; Responsibility 358; Samples and Materials Required 358; Procedure 358; Test Validity Determination 365	
57. Immunochromatographic Test for Malaria (Pan Malaria)	367
Scope and Application 367; Responsibility 367; Materials Required 367; Procedure 367; Interpretation 368	
Quality Control	
58. Quality Control of Blood/Blood Components	370
Scope and Application 370; Responsibility 370; Quality Control of Blood and Blood Components 371	
59. Quality Control of Reagents	377
Scope and Application 377; Responsibility 377; Quality Control of Reagents 377	
60. Assigning of Identification Numbers to Equipment	388
Scope and Application 388; Responsibility 388; Materials Required 388; Procedure 388; Documentation 389	
61. Calibration and Validation of Equipment	390
Scope and Application 390; Responsibility 390; Definitions 390; Procedures 391; Documentation 393	
62. Temperature Check for Temperature-dependent Equipment	395
Scope and Application 395; Responsibility 395; Equipment and Materials 395; Procedure 395; Documentation 398	
63. Equipment Maintenance	399
Scope and Application 399; Responsibility 399; Procedures 400; Maintenance Overview 415; Documentation 416	
64. Maintenance of Automated Immunohematology Analyzer	418
Scope and Application 418; Responsibility 418; Equipment and Materials Required 418; Procedure 419	

65. Maintenance of VITROS ECiQ Immunodiagnostic Assay System	422
Scope and Application 422; Responsibility 422; Equipment and Materials Required 422; Procedure 422; Annexure 65.1 430	
66. Use and Maintenance of Laminar Airflow Workstation	432
Scope and Application 432; Responsibility 432; Materials Required 432; Procedure 432; Precautions 433; Maintenance 434; Annexure 66.1 435	
67. Documentation and Record Keeping in Blood Centers	436
Document 436; Record 436; Aims of Documentation 436; Document Control 437; Annexure 67.1 440; Annexure 67.2 441; Annexure 67.3 445; Annexure 67.4 446; Annexure 67.5 447; Annexure 67.6 448; Annexure 67.7 449; Annexure 67.8 450; Annexure 67.9 451; Annexure 67.10 454; Annexure 67.11 456; Annexure 67.12 458; Annexure 67.13 459; Annexure 67.14 462; Annexure 67.15 463; Annexure 67.16 465; Annexure 67.17 466	
68. Audit of Blood Center	469
Introduction 469; Types of Audits 470; Medical Audit 471; Members of Hospital Transfusion Committee 472; Indicators for Monitoring of Blood Transfusion Service 474	
69. Hemovigilance	477
Introduction 477; International Hemovigilance 477; National Hemovigilance Program 477; Donor Hemovigilance 478; Recipient Hemovigilance 478; Workup of a Transfusion Reaction 478; Role of Blood Center 482; Annexure 69.1 484; Annexure 69.2 490	
70. Accreditation of Blood Centers	493
Introduction 493; Goals of Accreditation 493; Accreditation Dynamics 493; Benefits for Users/Patients/Donors 494; Benefits for the Staff 494; Systems for Accreditation 494; National Accreditation Board for Hospitals and Healthcare Providers, India 496; Advantages of Blood Center Accreditation 497; Criteria for Accreditation of Blood Centers 497; Quality Indicators for Blood Center 497	
71. Sterility Testing of Blood/Blood Component Units	499
Scope and Application 499; Responsibility 499; Materials Required 500; Procedure 502; Interpretation 503; Quality Control 503; Safety 504	

Biomedical Waste

72. Biomedical Waste Management	505
Scope and Application 505; Responsibility 505; Materials Required 505; Types of Waste Generated, On-site Segregation, and Storage 506; Cleaning of Glassware 506; Duties of Occupier (Hospital/Healthcare Facility) 506; Duties of a Common Biomedical Waste Treatment Facility Operator 509; Annual Report from Occupier and Common Biomedical Waste Treatment Facility 512; Accident Reporting by Healthcare Facilities or Common Biomedical Waste Treatment Facility 512; Operational Guidelines for Waste Management in Blood Centre 513; Handling Syringes and Needles 513; Documentation 514	
73. Autoclaving of Blood Bags after Use	515
Scope and Application 515; Responsibility 515; Materials Required 515; Procedure 516; Documentation 516; Annexure 73.1 517	
74. Management of Blood Spill	518
Scope and Application 518; Responsibility 518; Materials Required 518; Procedure 519; Documentation 520	
75. Management of Sharps/Needlestick Incidents and Other Exposure Cases	521
Scope and Application 521; Responsibility 521; Procedure and Guidelines 522; Training and Prevention 532; Documentation 532; Safe Work Practices 532; Management of Sharps Instruments 533	

Section 3: Regulatory Guidelines

76. Scenario of Regulations for Blood Centers	537
Introduction 537; National Blood Policy 538; Scenario of Legal Framework 538	
77. Drugs and Cosmetics Rules, 1945 (Part X-B)	541
Rule 122-EA of the Drugs and Cosmetics Rules, 1945 541	
78. Extract of Schedule K under the Drugs and Cosmetics Rules, 1945	551
79. Schedule F (Part XII B) under the Drugs and Cosmetics Rules, 1945	554
80. Storage Conditions, Expiry of Blood, Blood Components and Blood Products as per Schedule P of the Drugs and Cosmetics Act, 1940, and Rules, 1945	578

81. Surplus Plasma Exchange	580
Introduction 580; Guidelines for Excess Transfer of Plasma 583; Procedure for Transfer of Surplus Plasma 584; Annexure 81.1 585; Annexure 81.2 586; Annexure 81.3 596; Annexure 81.4 598; Annexure 81.5 600; Annexure 81.6 601	
82. Process for Grant/Renewal of License for Blood Center under Drugs and Cosmetics Act, 1940 and Rules, 1945	602
Need for Blood Center License 602; Procedure for Obtaining License to Operate Blood Center 603; Mandatory Requirements 604; Various Steps Involved in Processing of Application for Grant/Renewal of License for Blood Center 604; Important Notes 607; Process for Renewal of License 607; Annexure 82.1 608; Annexure 82.2 612; Annexure 82.3 614; Annexure 82.4 616; Annexure 82.5 617; Annexure 82.6 618; Annexure 82.7 620; Annexure 82.8 622; Annexure 82.9 624; Annexure 82.10 639	
83. Voluntary Blood Donation Camps	640
Introduction 640; Where One can Donate Blood 641; Requirement for Blood Donation Camp 641; Organization of Outdoor Voluntary Blood Donation Camp 643; Path of the Donor 645; Checklist for the Blood Donation Camp 647; Annexure 83.1 649	
84. Processing Charges for Blood Centers (Private as well as Public Sector)	651
Annexure 84.1 653	
85. Transfer of Blood/Blood Components	658
Scope and Application 658; Responsibility 658; Requirements 658; Procedure 658; Annexure 85.1 661; Annexure 85.2 662; Annexure 85.3 663; Annexure 85.4 664; Annexure 85.5 665	
86. Judicial Pronouncements—Blood Safety	666
Glossary	705
Bibliography	711
Index	713
