

Contents

1. Introduction	1
• Electrotherapy	1
• Ultrasound Therapy	2
• Types of Actinotherapy	2
• Hydrotherapy	3
• Cryotherapy	3
• Electric Shock	4
2. Low-frequency Currents	7
• Faradic Type Current	7
• Electrotherapeutic Currents	8
• Waveforms	17
• Current Modulation	21
• Indications for the Use of Low-Frequency Currents	23
• Physiological Effects of Low-Frequency Currents	24
Methods of Treatment	26
• Median Nerve Stimulation	30
• Ulnar Nerve Stimulation	33
• Radial Nerve Stimulation	35
• Erb's Paralysis	38
• Facial Nerve Stimulation	39
• Deltoid Inhibition	42
• Quadriceps Inhibition	43
• Lateral Popliteal Nerve Injury	44
• Faradism Under Pressure	46
• Faradic Foot Bath	47
• Common Motor Points	50
• Strength Duration Curve	54
• Iontophoresis	58
• Transcutaneous Electrical Nerve Stimulation (TENS)	60
3. Medium-frequency Currents.....	65
• Rebox-Type Currents	65
• Russian Currents	65
• Interferential Therapy	66
Methods of Treatment	70
• Proforma for Patient's Assessment	70
• Low Back Pain	74
• Periarthritis Shoulder	76

- Osteoarthritis Knee 77
- Absorption of Exudates 79
- Stress Incontinence 79

4. High-frequency Currents81

Diathermy 81

- Shortwave Diathermy 81
- Pulsed Shortwave Diathermy 97
- Microwave Diathermy 98

Methods of Treatment 101

- Proforma for the Patient's Assessment 101
- Cervical Spondylosis 103
- Periarthritis Shoulder 105
- Low Backache 107
- Lumbar Spondylosis 109
- Shortwave Diathermy (SWD) to Hip Joint 110
- Sciatica 112
- Osteoarthritis of Knee 113
- Ligament Injuries 115
- Plantar Fasciitis 119
- Salpingitis (Pelvic Inflammatory Disease) 121

5. Radiation Therapy123

- Infrared Radiations 123

Infrared Radiations 129

- Proforma for Patient's Assessment 129
- Low Backache 130
- Postimmobilization Stiffness 133
- Absorption of Exudates or Edema 134

Ultraviolet Radiations 135

- Production of Ultraviolet Radiations 135
- Techniques of Application 138
- Techniques of General Irradiation 138
- Physiological Effects 139
- Indications 140
- Dangers of Ultraviolet Radiations 141
- Contraindications 141
- Methods of Treatment 142
- Proforma for Patient's Assessment 142
- Ulcers 143
- Acne Vulgaris 146

- Psoriasis 147
- Rickets 149
- General Debilitating Condition 149
- Vitiligo 149
- Alopecia 149
- Sensitizers 150

6. Laser Therapy.....151

- Production of Lasers 152
- Types of Lasers 152
- Techniques of Application 153
- Dosage Parameters 154
- Dangers and Contraindications 155

Methods of Treatment 156

- Proforma for Patient's Assessment 156
- Tennis Elbow (Lateral Epicondylitis) 157
- Supraspinatus Tendinitis 159
- Golfer's Elbow (Medial Epicondylitis) 159
- Plantar Fasciitis 160

7. Superficial Heating Modalities161

- Paraffin Wax Bath Therapy 161
- Hotpacks/Hydrocollator Packs 164
- Electric Heating Pads 165
- Whirlpool Bath 166
- Contrast Bath 166
- Heliotherapy 167
- Sauna Bath 167

8. Ultrasonic Therapy.....169

- Properties of Waves 170
- Transmission of Ultrasound 173
- Attenuation of Ultrasound 173
- Ultrasonic Fields 173
- Coupling Media 174
- Treatment Parameters 175
- Techniques and Methods of Application 176
- Physiological Effects of Ultrasound 181
- Therapeutic Uses of Ultrasound 183
- Dangers of Ultrasound 184
- Contraindications 184
- Phonophoresis 185
- Combination Therapy 188

Methods of Treatment 188

- Ultrasound Therapy 189
- Tennis Elbow (Lateral Epicondylitis) 190
- Golfer's Elbow (Medial Epicondylitis) 191
- Supraspinatus Tendinitis 191
- De Quervain's Disease (Tenosynovitis) 192
- Bicipital Tendinitis 193
- Subdeltoid Bursitis 193
- Subacromial Bursitis 193
- Metatarsalgia 193

9. Cryotherapy.....195

- Basic Principles 196
- Physiological Effects and Therapeutic Uses of Cold Therapy 197
- Dangers and Contraindications 198
- Proforma for Patient's Assessment 198
- Ankle Sprain 199
- Muscle Contusion/Hematoma 200

Appendix: Proforma for Patient's Assessment for Using Various Electrophysical Agents 201

Glossary 237
